Thread: [==>> PRIVATE BITCOIN METHOD <<>> COPY+PASTE AND EARN UP TO \\$300 BTC DAILY <<>> REFUND](#)

Capital - February 7, 2019, 9:25 am

I've decided to temporary close the sales and this thread due to multiple good reasons, i will still be supporting and mentoring previous customers ofcourse.

I will re-open a new thread when i have new resources ready to deliver to prevent the old ones from getting saturated in the long terms.

Next to new resources i'm also working on a new ebook which is an more in depth version of the current one including different variations of the method aswell.

I'm also pretty occupied right now with all previous customers and i feel that if i accept any more customers i won't be able to deliver the High Quality support which i've delivered so far due to lack of time.

I thank you for your interest and support the past 4 days during the sales, i got banned on day 1 and unbanned on day 2 then suddenly sales blew up as people found out that this is actually a real unique method with extremely high potential and the fact that even a monkey can copy+paste is ofcourse great for most people.

Looking forward to the opening of "Satoshi's Bitcoin Method V2" by that time there will be alot of customer earnings aswell.

Best regards,
Satoshi aka Winstar!

Wolf's Vouch Review (Preliminary Review):
=====

As I have been building my reputation in the community, I urge people to wait for vouch reviews before they buy into any method(s).

(I am an Independent reviewer representing general members like yourself)

(Why me? My vouches are honest and detailed - not your one line sentence which gives no insight and actually devalues your method/services & thread. As an active member of the forums, I believe in providing quality & assurance to the community. As of late, I wanted to add to the lack of proper professional vouches left for methods & services. I believe that vouchers should be held to a standard like Theocritus & The Appraisers does and it is something I intend to replicate representing the general members. Besides having additional perspective and verdicts for these methods/services doesn't hurt. Other than that, you also receive a very professional looking vouch)

(Before this, I have had no relation/contact with the seller whatsoever - what you will read is based on the first-hand experience)

On to the Method/Service:
=====

The Method which is being sold by Satoshi is something completely unique and something I haven't come across before. ~EnlilWolf.

•?•

Originality: 10/10

Let's start with one of the most important things to any methods/services being provided. How original is the method? Why is it important?

Spoiler ([Click to View](#))

Well, if a seller is selling something which is recycled - pretty much expect the method/service to die out quickly. However, when they are selling something original - it helps to build up confidence not only in the method/services but also for the seller who is selling it. Now as mentioned in the brief one-liner posted above - This is something new & completely unique. And rest assured, when you end up buying it, you won't go like - oh hey it's this, I already know it. You'd instead be - Oh hey, this is ingenious.

...

Content: 9/10

Next most important thing - Is the content satisfactory?

Spoiler ([Click to View](#))

The only reason, I am giving it a 9 is because of my own personal experience. He could technically make the (.pdf) slightly more detailed, if not longer with some additional resources & links on the initial setup. Things which he is verbally expressing to his clients could be much better put into words with accompanying pictures - that the buyers could follow without having to disturb him. But on a second note, keeping it personal is a classy touch as long as he is free to respond and answer the queries. So, I am giving it a pass with a 9 because so far, his services & responses have been phenomenal. Without giving much away - the content is just pure fantastic from my initial read. That's all I will say for now in this preliminary review.

...

Method: 10/10

Next most important thing? What is the method? Is it truly unique?

Spoiler ([Click to View](#))

The method clearly is a 10 for me as it is something truly unique and I believe it will be the same for 99% of the buyers who end up buying this. However, without getting into the more advanced things - it seems pretty doable with the most basic of knowledge. On top of that, having a seller like Satoshi to guide you with your queries - you can't go wrong at all. It is not only unique, but I am also 100% sure it will work without a doubt no matter where you are from. However, expect a final ending vouch review from me which will end my vouch review officially. I will do that, once I make money from it with earning proofs. So, stay tuned.

...

Difficulty: 8/10

How difficult is the thing? Amateur or Pro level?

Spoiler ([Click to View](#))

I'd say it's somewhere in the middle, not exactly amateur level because your setup will dictate how much you can possibly earn. It can be the difference between earning \$100 or \$500 daily from my humble observation. However, from what I have also seen - Satoshi is there to not only help you set up perfectly but guide you with each and every step so that you can maximize your potential and make earnings to the best of your capabilities.

...

Price: 10/10

Pricing structure - Is it okay?

Spoiler ([Click to View](#))

For the price, that the seller is selling this method is a steal compared to the amount of money you

could be making. All I will say is - the amount you spend to buy this will be covered the first day itself alongside your initial investment. That much is guaranteed.

...

Overall: 9.5/10

My Verdict - Must Buy

Spoiler ([Click to View](#))

You will rarely see me vouching for most methods as I am aware on the kind of things they try to pull-off behind the back, however with this - I am not ashamed to say but I am vouching for this. As it works and what works - simply works. No use saying otherwise. The seller has been phenomenal in his services, his way of mannerism alongside his customer servicing qualities are just top-notch. You can't go wrong with Satoshi - that is my promise to you.

(Have a Lovely & Great Day everyone)

Regards, Wolf ?

The method is very simple, the setup can take maybe longer then 10 minutes as originally was said, it took me almost half an hour but i can see how people set this up in under 15 minutes.

After you've set it up it's a simple copy and pasting job like OP advertises, i don't know how to explain this without giving the method away but it's very simple and doesn't take much effort or hard work at all, it's just repetitive which can be boring.

As an active member of the forums, I believe in providing quality & assurance to the community. As of late, I wanted to add to the lack of proper professional vouches left for methods & services. I believe that vouchers should be held to a standard like Theocritus & The Appraisers does and it is something I intend to replicate representing the general members. Besides having additional perspective and verdicts for these methods/services doesn't hurt. Other than that, you also receive a very professional looking vouch)

(Before this, I have had no relation/contact with the seller whatsoever - what you will read is based on the first-hand experience)

On to the Method/Service:

=====

The Method which is being sold by Satoshi is something completely unique and something I haven't come across before. ~EnlilWolf.

•?•

Originality: 10/10

Let's start with one of the most important things to any methods/services being provided. How original is the method? Why is it important?

Spoiler ([Click to View](#))

Well, if a seller is selling something which is recycled - pretty much expect the method/service to die out quickly. However, when they are selling something original - it helps to build up confidence not only in the method/services but also for the seller who is selling it. Now as mentioned in the brief one-liner posted above - This is something new & completely unique. And rest assured, when you end up buying it, you won't go like - oh hey it's this, I already know it. You'd instead be - Oh hey, this is ingenious.

...

Content: 9/10

Next most important thing - Is the content satisfactory?

Spoiler ([Click to View](#))

The only reason, I am giving it a 9 is because of my own personal experience. He could technically

make the (.pdf) slightly more detailed, if not longer with some additional resources & links on the initial setup. Things which he is verbally expressing to his clients could be much better put into words with accompanying pictures - that the buyers could follow without having to disturb him. But on a second note, keeping it personal is a classy touch as long as he is free to respond and answer the queries. So, I am giving it a pass with a 9 because so far, his services & responses have been phenomenal. Without giving much away - the content is just pure fantastic from my initial read. That's all I will say for now in this preliminary review.

...

Method: 10/10

Next most important thing? What is the method? Is it truly unique?

Spoiler ([Click to View](#))

The method clearly is a 10 for me as it is something truly unique and I believe it will be the same for 99% of the buyers who end up buying this. However, without getting into the more advanced things - it seems pretty doable with the most basic of knowledge. On top of that, having a seller like Satoshi to guide you with your queries - you can't go wrong at all. It is not only unique, but I am also 100% sure it will work without a doubt no matter where you are from. However, expect a final ending vouch review from me which will end my vouch review officially. I will do that, once I make money from it with earning proofs. So, stay tuned.

...

Difficulty: 8/10

How difficult is the thing? Amateur or Pro level?

Spoiler ([Click to View](#))

I'd say it's somewhere in the middle, not exactly amateur level because your setup will dictate how much you can possibly earn. It can be the difference between earning \$100 or \$500 daily from my humble observation. However, from what I have also seen - Satoshi is there to not only help you set up perfectly but guide you with each and every step so that you can maximize your potential and make earnings to the best of your capabilities.

...

Price: 10/10

Pricing structure - Is it okay?

Spoiler ([Click to View](#))

For the price, that the seller is selling this method is a steal compared to the amount of money you could be making. All I will say is - the amount you spend to buy this will be covered the first day itself alongside your initial investment. That much is guaranteed.

...

Overall: 9.5/10

My Verdict - Must Buy

Spoiler ([Click to View](#))

You will rarely see me vouching for most methods as I am aware on the kind of things they try to pull-off behind the back, however with this - I am not ashamed to say but I am vouching for this. As it works and what works - simply works. No use saying otherwise. The seller has been phenomenal in his services, his way of mannerism alongside his customer servicing qualities are just top-notch. You can't go wrong with Satoshi - that is my promise to you.

(Have a Lovely & Great Day everyone)

Can minors do execute this?

Is it fully internet based?

Is any form of communication required?

Is there a group chat full of buyers?
Finally, how does it feel making that much money(lol)?

I'm intrigued.

I have many of the same questions that others have asked:

- What does it involve? Or, if divulging that information would reveal the method, then what does it not involve?

- Does this involve me reselling your "Private Bitcoin Method" I don't know if this one has already been asked, but it's the oldest "Just cut n' paste" method in the book.

- Are we to assume that you only accept Bitcoin?

- Are there payment cycles (like net-30, etc) or any other restrictions when withdrawing?

- How many hours does one have to put in to earn the minimum; \$100 for 1 hour's work is remarkable, but getting the same amount after a 15-hour shift isn't all that exciting.

buyerfortsk - February 11, 2019, 10:54 am

I bought the method, this is my small review so far :

PRO

- Original Method, never seen before ! I know a lot of way to make money online, but this method is really 100% original
- Can bring you a lot of profit
- Very very simple method, you don't need a special skill or anything, any normal human can do it

CONS

- Can be Saturated, not much people is needed to saturated this method, if we are 100 people who are doing this on a daily basis, the method will be saturated
- You need to communicate with several people and convince them to send you money for a service
- Not really copy/past ,in a way its a copy past because you will basically send the same message to several people
- The price is a little bit high for me, a good price should be 50\$ for the guide + full setup
- The full setup doesnt take 30 minutes as advertised, i'm waiting for almost 1 day now to begin the method...
- The 45\$ package will just you teach you the method and won't give you any ressource, if you don't have the ressource, you can end up doing this method if a wrong way and waste your money
- You need to PM people in a specific forum, but some People have blocked PM from new member, but I think it wouldn't be a problem, but its a good thing to know

TO SUM UP

This method is 100% original and can definitely bring you a lot of profit, its really easy to perform it
You will definitely get back your money within some days by doing the method
But the method isn't perfect, it can be saturated and the price is a little high, and you have to communicate with people

This is my honest review about the method

Can the method really be saturated as mentioned by the person who wrote the review?

Capital - February 11, 2019, 1:20 pm

Temporary closed until new resources are developed.

PRO

- Original Method, never seen before ! I know a lot of way to make money online, but this method is really 100% original

- Can bring you a lot of profit
- Very very simple method, you don't need a special skill or anything, any normal human can do it

CONS

- Can be Saturated, not much people is needed to saturated this method, if we are 100 people who are doing this on a daily basis, the method will be saturated
- You need to communicate with several people and convince them to send you money for a service
- Not really copy/past ,in a way its a copy past because you will basically send the same message to several people
- The price is a little bit high for me, a good price should be 50\$ for the guide + full setup
- The full setup doesnt take 30 minutes as advertised, i'm waiting for almost 1 day now to begin the method...
- The 45\$ package will just you teach you the method and won't give you any ressource, if you don't have the ressource, you can end up doing this method if a wrong way and waste your money
- You need to PM people in a specific forum, but some People have blocked PM from new member, but I think it wouldn't be a problem, but its a good thing to know

TO SUM UP

This method is 100% original and can definitely bring you a lot of profit, its really easy to perform it
 You will definitely get back your money within some days by doing the method
 But the method isn't perfect, it can be saturated and the price is a little high, and you have to communicate with people

This is my honest review about the method
 satoshi said that you do not need to talk to people or ask for money so is asking for money for a "service" in forums? that's nothing original

 That is not true.

You don't need to talk to people it's optional to increase earnings and it's also not selling a service or whatever not at all.

So why did you say that it is necessary to talk to forum people?

This method definitely involve talking to people, those people are the one who will send you money,if you don't talk to people, then you can't do the method ...

You won't create money from nothing

I think it will take you probably no more than 1 or 2 minute per person, you don't really need to convince them, at the time where you sent the message, you almost have the money...

But as I said the method is really 100% original and can bring you a lot of money

The 100\$ per day advertised is very very realistic, you can even make more than that

But I have some doubt about the possible saturation of this method because everyone will use the same platform to do the method

You will get your money back pretty fast

Does this method worth the money ? Yes it worth the money , its a good ebook for me

I understand, it's like a script that "forces" people to send you the money? or should the person want to send you the money? And if you do not want to, you should try another person?

Thanks for clearing that up for everyone i appreciate that.

Saturation risk is already solved, new resources are being developed which i outsourced and i've updated the guide aswell.

Thanks for the vouch!

I've been setting up the method so far and I can honestly say the potential in this method is very big and as far as it getting saturated, it can in one website but overall it's technically impossible due to so many websites that talk and explain bitcoins in general, just need to find those fanatics wherever they are.

I'm about done with the setup part and now it's the actual thing as stated by some users that used the method here, but their still oblivious to the fact that there's more to it than meets the eye.

I for one will say if the method doesn't work, then i will gladly give my honest review after I've done it for a few days giving me Pro's and con's as well since the support is actually good and the seller takes his time to answer me to the best of his abilities and vice versa.

I helped a few sellers here with vouches of mine known and unknown, if this method fails even for me then i'll give my honest review stating so as i don't hold anything back, never did, never will.

Will update anyone here on this thread within today or tomorrow if I made money yet as the first day was the setup which was fairly easy for me since I know basic HTML.

Do not PM me also as I will not be responding to any of them asking about the method, I'm on day 2 right now, if it works I'll state it if not I will as well, as it seems I'm probably one of the only few trusted members that bought this method and these newbies don't have the trust this website requires from them.

Thanks ^^

I received a lot of PM about the method, I cant read them all, so to sum up :

- You will make AT LEAST 100\$ per day
- Method is very easy to do, a monkey can do it
- This is the most original method i've ever seen here

There is just one concern for me :

- I think this method can be saturated if too much people buy this ebook , if 100-200 people do this method every day, at every hours, then it can be saturated, but its almost impossible to get to that point

If you buy this method now, then i'm pretty sure, it won't be saturated for the next month

To reply to the famous question " Should I buy this ebook ? "

I will simply reply YES

I've decided to temporary close the sales and this thread due to multiple good reasons, i will still be supporting and mentoring previous customers ofcourse.

I will re-open a new thread when i have new resources ready to deliver to prevent the old ones from getting saturated in the long terms.

Next to new resources i'm also working on a new ebook which is an more in depth version of the current one including different variations of the method aswell.

I'm also pretty occupied right now with all previous customers and i feel that if i accept any more customers i won't be able to deliver the High Quality support which i've delivered so far due to lack of time.

I thank you for your interest and support the past 4 days during the sales, i got banned on day 1 and unbanned on day 2 then suddenly sales blew up as people found out that this is actually a real unique method with extremely high potential and the fact that even a monkey can copy+paste is ofcourse great for most people.

Looking forward to the opening of "Satoshi's Bitcoin Method V2" by that time there will be alot of customer earnings aswell.

Best regards,
Satoshi aka Winstar!
