Thread: [XBox IP Puller](#)

VGMDON - February 7, 2019, 6:43 pm

Im looking for an IP Puller.

I already have LANC Remastered and it wont work for me.

Alternatively if someone could discord me and help me figure this out id be really appreciative and would be willing to return the favor.

Discord: Don#3459

BOOSLI - February 8, 2019, 12:26 am

Why? So you can boot people who are better than/killed you offline? Fuck off kid

Lmfao, the funny thing is... The fed's caught up with me 6 years later for doing this and gave me a cease and desist warning for using Hackforum Stressers...

If you think I'm kidding check this thread: <https://hackforums.net/showthread.php?tid=5918572>

Weird flex... I got caught my the cops guise I'm so cool

LinK - February 9, 2019, 10:23 am

Hey to be honest, the best time to do this Xbox booting was in the heydays of the Xbox 360. Nowadays if Microsoft suspects you of anything its an automatic suspension. I wouldn't put them past a console ban. They really tightened up their security. Honestly now it isn't worth it.

illuminati? - February 9, 2019, 5:14 pm

OP you need to GTFO.

DDoS'ing is for 13 y/o.

xr 1.4 - February 9, 2019, 8:38 pm

I guess nobody is going to answer this question properly.
Just bridge and use Commview

This.

Live with it boi.

More of a warning than a flex. It surprised me more than anything.

Most people just use stressers to hit home connections. I don't see the need to DDoS them. When we start talking about the kids on NFOs/OVHs that think they are a god, then DDoSing gets a bit more interesting.

Yea, its even hilarious people are thinking you will need 1gbps at least to take down home networks
? Shit is hilarious, considering they don't know how ddos works

Theog5 - February 15, 2019, 4:06 am

Lol so this is why I lag sometimes after getting hate mail

Conner - December 14, 2020, 6:39 pm

After the update it doesnt work for xbox
