Thread: [\[Community and SCAM Alert} Mon3y uid=123689 , Pleas dont buy from him !!!](#)

HaRDBit3S - February 8, 2019, 3:01 pm

This is my REAL Review of this software from this user :

mon3y

Jabber/xmpp : mon3y@exploit.im

<https://hackforums.net/member.php?action=profile&uid=123689>

I purchased this software thinking it would work fine, but its not even starting.
I have payed 110 dollars for nothing, its a crap software

I tried on Virtualbox and it did not start, i have wasted weeks to get it to work.
I tried on VMWARE, the software started but its not working with any rat
And i have asked him multiple times for help and he does not help
he always responds very late, like hours or even days later.
Does not help get it to work

his software is very outdated and does not have proof of working with any RAT
He even mentioned that he does NOT use any rat himself
This seller does NOT say on his thread that its for one month or one year , but people think
they buy for one year !!!
His software does not work at all with diferent RAT''s software
i have tested with different RAT, nothing works

When i ask for help he does nothing
He has blocked me on jabber/xmpp

I do NOT RECOMMEND anyone buy this exploit from him !!!
He dont want to give my money back and is very rude !!!

DO NOT BUY, YOU WILL LOSE YOUR MONEY !!!

This should be in marketplace, not in Lounge. :([Marketplace Discussions](#)

I also got scammed by a user named virus, if you want to warn people try to find the right section :)

You sir are in the wrong..

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

You should ask a staff member to move the thread to marketplace discussions. I don't think this thread belongs to The Lounge. Anyway.. Why didn't you make a contract? You could have opened a dispute if you were that unsatisfied.

Maskin - February 8, 2019, 3:35 pm

Uhuh, I always tell people to not buy anything from here. I wish it was more legit but people just want to make money and it will always be that way.

thats why i have to warn people about that scammer

i will not stop untill i get my money back

I understand you're upset about getting scammed, and tbh you're not gunna be banned for not using a contract, rather for:

1. Spamming and posting threads in the wrong place, intentionally, because your deal dispute was closed - <https://hackforums.net/showthread.php?tid=5938356&pid=58235629#pid58235629>

2. Talking shit about site rules and policy because you made the conscious decision to not read and follow the rules and do what you wanted, only to have it bite you in the ass.

"i will not stop untill i get my money back
and untill his sale thread is gone/removed"
You're gunna be banned long before he is at this rate.

Admins do care about people getting scammed, but their hands are tied if there's not a contract because people can fake proof left and right, so they don't get involved if there's no on-site proof. You could've got him banned and what you wanted if you had read the rules and followed them when doing that deal. But you didn't. You're mad at other's for your own mistake.

I'm sure Money has seen you doing this and is just laughing his ass off cus you're making a fool of yourself and are gunna end up banned while he gets away with it. There's proper ways to handle situations, you're on the opposite end of that spectrum right now.

Should read Omni's reply in this thread -

<https://hackforums.net/showthread.php?tid=5938681&pid=58244282#pid58244282>

Shows just how much he does actually give a shit, if you follow site policy.

you have a point on some things
but what matters is he still a scammer
banning him would still not get me my money back unless he can use his brain and give it back
your mistaken if you think i will stop
i will haunt him until he gives my money back
im not gonna let him scam more people here
maybe you should do something about that too instead of telling me im in the wrong buddy

Contracts are necessary for all deals on site retard, wouldn't expect someone with 60 iq to know that though so it's all good.

I cant believe this clown is still scamming people here. He has +10 disputes atm.

I can confirm he is false advertising his shitty product, this is where the disputes comes from:

- macro is never FUD, not even close to FUD.
- this clown is down enough to post 1 month old scan link. He is still doing this :facepalm:
- his silent exploit is just a VBS script with spoofed extension to .doc, it has a VBS icon as well(instead of office) so it looks like this: file.doc.vbs - SILENT EXPLOIT HAHA

This is how you try to cover your actions:
