Thread: [\[HELP\] Evilginx2 failed to obtain certificates](#)

znonk - February 9, 2019, 12:28 pm

Hello!, I installed Evilginx2 from precompiled binary package. I added the nameservers (ns1 & ns2) and I have this error when I try 'phishlets enable instagram'

GitHUB: github.com/kgretzky/evilginx2

It's hosted on NameCheap.com (VPS + domain)

Error code: [w w w .i.imgur.com/wMHbBeZ.png](https://www.i.imgur.com/wMHbBeZ.png)
