Thread: [Keylogger Service - Email or FTP](#)

**raghavsood999** - February 9, 2019, 8:40 pm

Hey i am selling a keylogger as a service. I have made my own in delphi and the server and client have no dependencies what so ever.

These are the main features:

Delivery Options:

Email Key logs or

FTP Key logs which triggers UAC

Select time interval for delivery of logs, screen shots or passwords, delete logs after delivery and self destruction date of server.exe

USE SSL

General Functions

Fake Error Message, with Error, Question, Warning and Information Windows and Icons, Add to start Up, Melt File, Hide Folder, Hidden Start up, Delay Execution in seconds, Password Recovery of any web browser and Steam, Steam Reset, Get System Information, clean cookies, cache, history in all browsers, UAC bypass in Windows 7 only, MUTEX and install to app data, program files or C:/Windows and Folder name.

AV Killer - UAC Trigger

and Bot Killer - UAC Trigger

Advanced

Screen shot logger, webcam logger, clip board stealer, ip logger, un killable process, hide process, usd spread .ink method, anti debugging (blocks VM)

Extension Spoof er .rcs or .jpg

Icon Changer

File Binder - silent run, visible run or bind only

file pumper IN KB, MB OR GB - 1000KB, 1000MB or 1GB

## PRICES BELOW:

Email with all settings except USB spread is \$5.00 lifetime + USB Spread is extra \$3.50 using new .ink method - FTP - triggers UAC is extra function which is costing \$2.00 usd. Please recall that i mentioned that the keylogger may get Un FUD so you have to remotely update your server.exe and that's via update link. However, it will trigger UAC prompt on remote side so be careful. However the server.exe created or output from the client is FUD
