Thread: [Unlimited Web-based Shells || Javascript Loader Source](#)

hunterr - February 9, 2019, 10:15 pm

As the title says, I am selling a method for shells and source for a JavaScript loader.

All items will be \$10 for now.

How type of file can be loaded with javascript loader? A executable file? Or what?

You run a JavaScript file on the victim's pc, and it connects to a server. You can configure it to silently rub any kind of executable file. Exe, jar, etc

ThankYou for Your reply, I have a loto fo code for this herer, but in my country it is hard, because here they use a system who breaks javascript based file when executed inside HOMEDIR from user, and Download directory is inside of this.

You could embed it into an application installed somewhere else.

Adding a new product today.

hunterr - February 15, 2019, 8:14 am

New product up. Check it out

hunterr - February 18, 2019, 1:55 pm

Prices raised a bit to make up for low sales.

hunterr - February 21, 2019, 8:18 am

1c donation added for lols

hunterr - February 24, 2019, 2:51 pm

New product added. Thanks for traffic.
