Thread: [What was cool when you were young but isnt cool now?](#)

Dope - February 10, 2019, 12:22 pm

The title says it all.

For me it would have to be collecting marbles and also other weird things like special papers, cards, stones...

Also the fashion was pretty weird and wild in the early 2000's looking back on it.

Anything toy related things i guess? The real question should be "What was cool when you were young and still is cool?"

shock sites and videos are popular back in the mid 2000's, there was some fucked up shit I saw back then.

Also I don't understand why these no profile pic unupgraded members decide to dig up threads that are years old like what makes you decide that's a good idea?

they need the bytes to get txt tutorials for methods for dead websites like omegle ? but yeah rip liveleak, internet isn't the same without a little harsh reality

I initially thought they click on the "possibly related threads" at the bottom and not knowing how old they are. That does make sense too but wouldn't be easier to just reply to the most recent threads in multiple forums?

yeah lol I just check the most recently bumped, tend to avoid related threads just in case they're too old
