Thread: [Hypnotist \(UID=2476428\) Returning almost 1.5 years + New PM proof admitting of scam](#)

Soulmate~?? - February 11, 2019, 3:36 pm

If you were around in late 2017 you might have seen a deal dispute against this member in which he scammed the user Night for \$50 BTC and vacation banned himself before setting his status as this

Thread link:

<https://hackforums.net/showthread.php?tid=5735056>

He didn't return to HF for almost a year after that and he came back to make a few posts, but still didn't reply to the scam report in question which makes him look even more suspicious. Now if you look at that thread you'll see a post by this user claiming that Hypnotist didn't scam and he's going to return the money and refund x5 the amount, which obviously didn't happen. This is most likely Hypnotist's multi because he has only posted and come online when Hypnotist has and vice versa, but who knows if that's the case. Also they have the same posting pattern, active sections, etc. but of course it doesn't mean anything without concrete proof.

Link to the user in question: <https://hackforums.net/member.php?action=profile&uid=3294682>

For example, if you click on [this](#) thread and [this](#) thread they are basically the same thing one week apart. Of course a lot of people have an iPhone X but adding to the suspicion from before it's pretty obvious this is the same user.

Also I saw a thread by Mr. Robot where he was scammed by the user in question for \$10

https://hackforums.net/contracts.php?action=view_dispute&cdid=626

And as if the user isn't sketchy enough here is a thread where he denies using a middle man under any circumstance and when no one wants to buy from him going first he claims to have sold the codes to another user with who they are most likely working together

<https://hackforums.net/showthread.php?tid=5734417>

Now here's where it gets more interesting and why I decided to open this CA in the first place. Today he opened [this thread](#) where he once again started selling Starbucks giftcards. Of course Night posted with the scam report asking if he is going to respond to it and Hypnotist closed the thread. I remembered this CA from 2017 so I decided to look into Hypnotist's threads and [saw another bullshit claim where he said he was going to be earning \\$80,000,000 soon](#). Of course he made it seem like 80 million dollars when it was 80m in RS money (\$80) or he was just trolling but it looked like most people took the bait so I still posted on the thread asking if he might be able to refund the money he scammed if he runs into \$80m ?

Now at this point he must have somehow gotten me confused with the user Night because I got the following PM shortly after

Spoiler ([Click to View](#))

Anyone with a brain can see that he's basically saying that he scammed the \$50 but if I close my mouth he will repay a bigger amount, a similar claim that was made by the user ohlynx in 2017. Of course no one would fall for this so I'm making this CA so warn people to avoid dealing with this user in the future. I know that I wasn't the user that made the deals with him so I'm not sure if this

thread is against the rules or not. If it is then let me know and I'll remove it.

cokecaine - February 11, 2019, 3:51 pm

Chill. He probably needs a little more time to pay the bank transfer fee to have that Nigerian prince wire him that \$80m.

Goodnight. - February 11, 2019, 3:56 pm

Coming into 80M when my sentence is over.

Anyone got any spare dosh? I will return it with a much bigger amount. This is a promise. And yeah, this sentence has been going on for years. But I'm 23 on 15th Feb and I'm hoping that it's going to end then.

"Hi. I bought 1000 USA bots from Exploitman from exploit.in (his Skype is exploit.im) he is a reputable hacker and says this is worth \$350 but doesn't believe it's cracked. If I buy this and I buy say 3000 bots from Exploitman how much will I make per week? The 1000 bots I have are high quality. A lot of gamers. A lot have told me mining etc is useless in botnets. I use a RAT. I don't want to do black hat stuff but let me know where you think I should go as I have a lot of bots. I have quite a lot of bitcoin and am looking for good investments. Thanks.

I don't really want to waste too much time on this but I know people are going to ask for proof, even though it's pretty obvious if you compare the two accounts' posting history.

The biggest one I found was his twitter link that he posted under the name "Alexdaprophet". On his old account, Hypnotist said that his name was Alex Buckland and that he was a prophet as well. I know there could be thousands of people with the name Alex, but for two people to both claim to be prophets on the same site with the same name is pretty unlikely, especially after his account has been closed recently.

Also here is the classic, "being blessed by God", when last year he was talking about being possessed by the devil on his old account. And, even on the new account he was talking about how he "saw the devil" after taking acid.

Like I said, if you know this guy you will know this is him 100% just based on his delusional rants and general retardation. But, if anyone needs more proof I'm sure I can find tons more connections.
