Thread: [Whatsapp Hijacking method.](#)

Mr?? - February 12, 2019, 5:19 am

Hello,

I'm thinking about creating a tool to hijack whatsapp sessions. (I already know it works)
However before creating it, my question is if there is any ask for a product like this.

Please let me know if any of you are interested in this.

With kind regards,

Mr.

Yes. This is very saught after. If you can make a program that uses this functionality then you will be sitting on a gold mine. Currently everyone is hacking whatsapp through a SS7 network vulnerability and even still it has it's issues.

Buy the appropriate hardware and software. If you want to find out which software you need then I suggest you research or purchase the exploits massly available online.

Seems like an interesting idea but is it basically hacking the account or getting into peoples conversations?

muj1337 - March 3, 2019, 4:57 pm

I think it's only possible through ss7 Ya know brother have u definitely done it before

Also required the person not to notice the recovery requests being sent to them or something. The user had to be asleep or away from their phone long enough to get away with it.

lampakia - March 11, 2019, 8:39 pm

interested with your tools.! let me know when its ready!

??????????Michael Kors - March 11, 2019, 8:45 pm

I'd definitely buy this depending on the price.

VenomBlade - March 13, 2019, 2:13 pm

I want this, can i have it once its done?

Demya - March 13, 2019, 9:08 pm

SS7 doesn't help you. It just tells you the roaming location of the phone. It's used for billing and pin pointing a radius (in relationship to the cell tower) where the phone is located.

I think many people will like a project like this.

tidust008 - April 12, 2019, 9:49 am

Sounds interesting, let me know if the project is finished, willing to spend money and try..

D3mian - April 12, 2019, 10:06 am

Super interested in what you're doing bro! Let me know when finished!

Last_viking - *April 12, 2019, 1:09 pm*
Try using QRLjacking first lol
