Thread: [\[GUIDE\] \[VERY CHEAP Quick Buy\] >>How to get multiple MSDN Admin Account's! <<\[\\$2\]](#)

pwntoken - August 6, 2010, 1:32 pm

Name :--> How to get multiple MSDN Admin Account's!

Re-Sale Rights - YES. \$10

Price on HF --> \$2 [S00n to be Raised after 3 Sell]

Reviews : YES Below is a Review.

Quote: QUALITY OF INFO: The raw information is very helpful. This contains all the answers to everything, and walks you through everything involved in creating MSDN accounts. Barely Blackhat, and shows you really everything from the ground up. 5/5

COSMETICS: Most eBooks you should save in PDF format. Also, add pics for more support. 3/5

Depth: Shows everything very well, guided me through the whole process in minutes.

I recommend this to everyone here. \$2 would be a steal for this quality book. Also, it is VERY doubtful that the keys you get will EVER be banned. This book takes you through many precautions to avoid this.

OVERALL: 9/10. Great job, just save it as PDF, and make it more attractive.

Thanks This is a QUICK BUY PM me for Buying and Post in this THREAD your are Willing to Buy.

Blady - August 6, 2010, 1:54 pm

Can i have a review copy too? I would give a complete detailed review. Thank you.

Don't buy this guide. This is not his guide and he does not have resale rights for it. And this does not show how to make multiple accounts. It basically just shows you what any other MSDN guide shows you.

Ok got a Review From this Amazing user > brøken/šøul Still Selling \$2 is a STEAL.

Grand Pootis - August 6, 2010, 2:34 pm

Don't listen to Blady. He needs to provide proof this is stolen. Else, it is bullshit. I personally thought it was a great guide. Most others are expensive.

Itachi Uchiha - August 6, 2010, 2:39 pm

It has a high probability of being leached or just a rewritten version of an older guide. Sorry if I don't believe broken/soul is a very trust worthy member to be deciding with a ebook is sufficient enough.

How do we know if this method still works? According to my information, the only way to get MSDN accounts nowadays is by carding them.

Let me rephrase: the only way to get an MSDN account nowadays is by doing "illegal" things, meaning that the Bizspark method in your guide doesn't work anymore.

Is that better? (man, I really hate mini-mods]
