Thread: [Are we allowed to sell illegal/blackhat money making methods?](#)

caomayn - February 14, 2019, 8:10 am

I was wondering, over the years I've had a steady income for money on the side. These methods are illegal/blackhat. Are these allowed to be sold?

One of my ways is not fraud. One of them is extortion which I don't know is considered fraudulent.

Blackmail isn't allowed either

Yet I've seen so many blackhat methods out there.

Yea this was kinda the reason I questioned selling it.

No, I would suggest steering away from this type of activity before someone up high wants your autograph. Though you make your own decisions and I cannot tell you what to do but remember you will eventually lay in the bed you make.

As I remember when I have read the rules, there was something like "Any kind of blackhat activity is forbidden on HackForums." , so I guess it is forbidden as well to sell blackhat methods.

No you can't, its illegal

Depends on the method. Considering you mentioned extortion, then no, don't sell it here.
