Thread: [Harassment.](#)

Atlantis82 - February 14, 2019, 12:14 pm

I'm proud such a forum exist back in my day I program DirecTV cards DSS and all that good stuff with the card readers Etc since then I have had children and grown up and no longer had time for any of that as it was a hobby I never done it to make any money or I never done it for profit but my own interest as it was a hobby for me. I was a member of a few underground websites . I used to write program code and Flash it to the a tiny 2313 using a parallel port and a programming language they call Assembly Language I am a bit Rusty and if I had it to do over I could but I'm not sure I would have the time or the children I have and My wife. I have seen there are gray programmers here on this forum.

I have been getting 40 to 50 prank calls a day people call and they do not say anything I own a small heating and air conditioning business I have to answer my phone for a living I have a plan through Verizon I have my dad on my plan and my wife as well. The calls I have been getting or hang up calls each time it is a different number and when you call the number back the number does not exist it's locked they makeup the numbers the way they want them one of the numbers was area code 1 1 2 3 4 5 6 and it kept going that way.

What really pissed me off is when my wife received a phone call that stated your social security number was going to be suspended far criminal activity and I did not hear all of the call but I did file a police report and the police informed me there was nothing they could do and pretty much laughed.

I am not familiar with how the cell phone system works but I think it has its own network and I also learned or I was told that IP addresses are useless when it comes to telephone switch I disagree because my telephone has a IP address embedded in it.

There is a coward hiding behind a computer threatening me I sure wish I could learn how to figure out exactly who this person is because I believe they may be local either way if not I got to figure out how to trace these Anonymous numbers back that only seem to exist for just an hour or so.

Also Packers keep turning my microphone and location and all that good stuff on in my Google settings I have had to abandon an email I've had for several years now that really angers me as a businessman I need that email but I can no longer have it on my phone because of hackers. I have been having problems with Facebook also. I do apologize for the typos and misspelled words as I am speaking to my phone as I am on my way home from work in the passenger seat with very limited time it's only at night I have time to program and research. I have also made several post on my Facebook about the alcu which deals with crooked higher power and I may have pissed off a higher-powered system. However if I did is because I do not believe in wasting taxpayers money own useless tickets that Target the innocent when they system use more of their time targeting the ones doing the major crimes rather than wasting their time with adultery in the offices Exedra. I stand up for the people of my communities rights because they will not do it for themselves and I don't like to see people run over so if anyone could please help me learn a few of these programmes to get to the bottom of who is attacking me I would have greatly appreciate it and wouldn't speak to anyone of it only day what I got to do.

Any recommendations will be greatly appreciated thank you from Alabama.

Law enforcement said they can't do anything about robo calls since I didn't know who was doing it. Sucks! He laughed as his phone rang and said look, I'm getting one right now. He told me to change my number that pissed me off, I said look man I have HVAC contracts with this number I can't change it, and I might have to go to the capital. He said "for robo calls?" He was pretty much an ass!

ririki - February 14, 2019, 1:33 pm

I have company and I work as manager, I keep getting calls every day and each day I get 5-15 calls from either advertising company or none-speaking people.

Just try to ignore and hang-up.

Nowadays finding these people is harder and harder unless they do it publicly.

I would suggest blocking it but it's a bit risky as long as it can be customer and you can't just block him...

Nowadays finding these people is harder and harder unless they do it publicly.

I would suggest blocking it but it's a bit risky as long as it can be customer and you can't just block him...You mean to tell me this only started with my new Verizon plan and my number I ported it over I've had for years and I have to put up with this laying my tools down to answer what I think is my customers phone calls that cheats me and my customers out of our time so there is no way to trace down who is doing this so I can file harassment charges there's no program no IP tracking it's impossible to do this is that what I'm hearing?

I mentioned I was a programmer for a reason I'm not here playing I am looking for options and I know someone out there knows what I am looking for so please feel free to message me if you are afraid to speak openly.

Correct me if I'm wrong but the top of the page reads hackers is it possible I am in the wrong place.

Just trying to get a little attention here since I put my time and effort in registering on this site with the understanding many things like this is claimed to be done here, as the title hackers carry. I am In no why you trying to be smart but if there is no skills here in that area then the name of this website needs to be changed.

I will be patiently waiting for a response.

Thank you, hacker forums.

Atlantis82 - February 14, 2019, 9:57 pm

Thank you salary blood I will give that link a shot hopefully there is more than just one person here they can do these sort of things or has knowledge of them I am somewhat shocked that I do not see much going on on a hacker's website with very little responses. Yet I have looked at this forum and it has many amazing categories and a wealth of information I'm sure there is a lot on this forum I am just not exactly sure if it's a script key for them or a program in Flash whatever I've only read over it a day or two briefly.

The problem with a provided link is and I'm not going to mention the screen use your name I do not have 25 post so maybe he will see this and message me instead or maybe you can message him for me since I don't want to stay up most of the night making phony post just to get a 25 postcount to send a message I would gladly donate and probably still will if I find the site helpful, But like everyone else my boss man is seasonal and being an ass there for I have not been paid I'm either poor or Rich no in between for me when I hit that lick and I have found satisfaction here I will throw a bone.

SORRIE - February 14, 2019, 10:05 pm

If you can't take the heat get out of the heating and air conditioning business

nah but its probab;y some skid on here doing it

Atlantis82 - February 15, 2019, 2:30 pm

I'm driving at the moment all of my text has been through voice to text conversations I have had the time to open my laptop when I do that it's on like Donkey Kong I have plenty of patience my life revolves around it no offense taken to your post but if there is a way I can assure you I will find it I always do I have always succeeded in every task I have set out to do. It is our tax dollars that pays the salary of our police officers so with that being said it is affecting my work and I do not feel as if I have been served and protected the only thing I ask is to find out who is doing this to me we just got three text messages as we speak it is very annoying I am obviously a target of someone's harassment this is not a funny situation it's no joking matter when I have to lay down my tools to answer a phone because my customers are highly favored and I do not deserve me too avoid them because I do not know who is calling. As I said before when I am broke I am broke but when I have money I have it I will not put up with this my donations are satisfactory when I am paying respect to the one that helps me I'm not asking anyone to do anything my problem is I don't have time to research the four of them to point myself in the right direction not sure there is anything on this forum. I do not know the apples from the oranges and nobody here on this site has stepped up to even State the basics what exactly can you and can you not do with these phones knowing it's Unlimited when it comes to flashing a program data I just wonder what is known here.

Sorry to post back-to-back but I just remembered seeing a category on this website called JTAG I have yet to read it what are you guys using the jagtag The Flash what programs are you using are you aware these can be altered through a hex editor to do just about anything. I'm just saying point me in the right direction Verizon my no longer like me when I write the code myself and free wire it right here on this site and give the site the credit it deserves as it did pop up in the top Google search and that is why I am a member.

Atlantis82 - February 20, 2019, 12:06 am

I will be updating this thread soon.
