Answers and Questions

1. Can I spread my comments over multiple videos? Yes, however you wish.
2. Will they all come at once? No, I drip feed them so they have normal time stamps, and all have profile pictures and believable/normal profiles.
3. Will the comments look real? Yes, you wont tell the difference and can tell me exactly how you want them to look if you are not happy with them.

4. What bot do you use? I use a private coded bot, and its not for sale.

5. What if I dont have any custom comments to give you? No problem, I have very good comments lists for all types of videos

6. What is drip-fed? they cont come all at once so the timestamps are trustwrothy

7. How can advertising comments help my channel? I can target any niche videos you want and talk about your channel in a normal way advertising it. Not even the video owner will delete the comments.

8. Can I have the comments write to eachother? Yes, in any way that you wish.

9. Can I spread my comments across videos? Of course
TOS:

- I will not provide comments to people spreading malware under any circumstances.
 - I will not give you a refund if you mess up your custom comments but will provide you extra comments if it where to happen.
 - NO Refund will be given if your video gets removed as it is not my fault.
- NO CPA / PPD comments UNLESS THEY GET SOMETHING (ANYTHING/Even a useless ebook/file) IN RETURN. [contract=tid]Start Contract[/contract]

Hey as an idea for you espacially when it comes to commercial videos like CPA/ads it would be nice if you have different sets of names available and already prepared.

For example German names, French names, Spanish names for the profiles and so on.

With most services if I buy comments I end up getting the issue of very bad names like russian or chinese signs and then ofc that's not what I am looking for.

At the moment all of my names are USA based names without any symbols or other languages.
Thanks for the suggestion I will def be making different language packages.
