You prove to be more worthless than the salt you spent on the UB...

He asked a totally different question compared to your search, so HOW THE FUCK DID THIS HELP? ? ???

@OP, you need to search out some tutorials, and learn some networking, gaining remote access to another computer is easy, but it still takes basics.

I mean TECHNICALLY this can be addressed with a reverse proxy and their cookie dump.

Am I right, or am I right?

Actually this is a good point nice suggestion

This honestly slipped my mind
