Thread: [Strategies/algoruthms for binary IQ options](#)

heart4hack - February 16, 2019, 6:01 am

We are developing a python program which uses one popular binary IQ options api to do trading.

Till now We have implemented 2 algorithms to predict the next outcomes.

Anyone have any suggestions about adding some more algorithms or strategies?

richgang007 - February 20, 2019, 12:58 am

I tried my hands at binary options some time ago but it didn't work out.

then tried "blackhat" ewhoring...and geez for the first few weeks, I was shocked at what i was actually earning..lol

I went from almost getting thrown out of my apartment to getting a nice crib of my own!!

so why am I saying all this trash?..well just wanna let you know that there alot of ways to bank big online;and this trading thingy surely ain't one of them!!!

Binary option = GAMBLING

Anyone selling BOT / signal for Binary option shouldn't be trusted under any circumstances

heart4hack - February 22, 2019, 10:13 am

You are wrong. There are soo many algorithms which will be used to predict the outcomes.. it is just a matter of choosing the right one ..
