Done. I didn't feel like the options provided in the survey contained all reasonable options, so I answered to the next available choice.

Just completed this, a few questions my answer wasn't there so I chose the closest answer to it.

Good luck with your work!

Done, but I expect to be eliminated from the data-set.

For one, I'm older than 34, secondly, I had to be a touch creative with a couple of the answers, because either, I couldn't select both correct options; or I couldn't select 'no' option.

Also, how in the fuck is this a dissertation? What is it, some brain-dead, beyond vapid, consumerist culture bullshit? Seriously? This is for a degree?

Dude, change your degree plan, go to a different school, and/or kys. Whatever the fuck you are involved in, you are wasting time and money.
