Thread: [Looking for Greyhat SEO SPECIALIST \(Serious Inquiries Only\)](#)

MegaByte - February 18, 2019, 11:38 am

Hello all, I am getting ready to embark on a serious venture that should take about 3-4 months max to build out.

I am in hiring process right now and I have all roles picked out, the only thing missing is an SEO EXPERT. Please, no blackhat SEO stuff that will get our websites sandboxed.

I used the term "PARTNER" because that means you will have equity in this business. You, myself and one more person on the team will have equity, meaning a % of the profits after everything is built, so thats a huge benefit.

However, Partner also means that you, myself and the other partner will understand that we won't be getting paid while we are building the foundation for the first 90 days or so. You must be okay with this obviously. But the payout has potential to be nice, and once its built, you will be collecting passive income every month, without needing to do any more work. We will discuss percentages.

If you have read this far down and think you are a candidate:

1. Pm me your skype.
2. In your Pm, talk about what you can bring to the team and talk about your SEO skills.

Looking forward to hearing from some of you. Serious Inquiries only.
