Thread: [DoYouCode's manual botshop | executes/installs | ALL MANUAL! | 0,15\\$/bot](#)

DoYouCode - February 19, 2019, 2:54 am

Hi,

I will be selling executes/installs.

My price is going from 0,15\$ per execute or install.

I will do all executes/installs manually. So it can take some time before full delivery.

All installs/executes are actual people their pc's, so it will deliver some good logs (I guess).

I will make sure the person will run the program themselves, if needed with administrator access.

Prices;100 installs/executes for 20\$

200 installs/executes for 35\$

500 installs/executes for 75\$

100 installs/executes for 30\$ [I will make sure it gets executed as administrator]

200 installs/executes for 52.50\$ [I will make sure it gets executed as administrator]

500 installs/executes for 112.50\$ [I will make sure it gets executed as administrator]

Those are my prices. Anything above 500 installs/executes will be 0,15\$ per execute or install.

Know that all of these will be manually done. And there is no other application on the pc that will run your application. This will make that almost all the bots will be unique, and not shared with other sellers.

To buy, contact me;
telegram; Hattorius

Payment methods'
Crypto only.

Thanks for reading.

didnt u tell 0,15\$ 1 bot,,,, so 100 bots 15\$? 20\$

turbosoggy - February 19, 2019, 1:13 pm

You should redo your post....

You say "My price is going from 0,15\$ per execute or install." but then "Anything above 500 installs/executes will be 0,15\$ per execute or install."

Also 112,50\$ should be 112.50\$
