Not sure if this is valid still however, here is a glitch referencing how to get free coins for Apex Legends. Skip to 9:50 in the video to actually get the method.

Yeah I wasn't able to replicate his steps due to the fact that I am not home however, if you want to try it and report back, then feel free. I only posted this because I knew everyone here wanted to know a method to get Apex Coins.

I can probably guarantee you'd get banned too so I recommend utilizing an alt.

I just watched from that 9 minute mark you've stated in your original post.

Uh, I'm not entirely sure why you'd even post this LQ post tbh.

Hitting X, then hitting X twice? and then unplugging your ethernet cable?

That would just cut all connection to Apex and disconnect you.

This in no way will give you free coins? I don't understand why you would even think this would remotely work.

I agree, this post is low quality, because I simply can't comprehend a video.

Thanks Shark. I'll give it a shot.
