Thread: [Create 6 boxed clickable items with rollover](#)

Dashybaws - February 19, 2019, 7:05 am

Hi Guys.

I'm having some trouble with creating 6 boxed items that take you to different pages within the website.

I'de like to create something like this: <https://prnt.sc/mn84ds>

I cannot seem to find any plugins anywhere that can help me make this look like this!!

If someone could help me or point in the right direction I would appreciate it.

Many thanks.

I don't think you get what I mean bud,

I need something that essentially has 6 Boxes.

- 1.Each box navigates to a page
2. When you roll over, it changes the image and the background.

Thanks a lot for getting back to me Mr Magnificent.

That would of been exactly what I was looking for, but I've got it done now another way instead.

Thanks a lot for your help though, I appreciate it.

Many thanks.

Dashy

Please get back when you've finnished your project, would love to see it.

Have a nice day.

I will do, thank you.

You too.
