Snip - sorry, I thought it was real. Thanks

Black Hat - February 19, 2019, 12:49 pm

Take your snake oil elsewhere, no one is going to buy your shitty product.

asvps - February 19, 2019, 12:51 pm

You created a fake Business Insider page just to promote this garbage lol

TheChaosKiller - February 19, 2019, 12:52 pm

Tried it, dick fell off. 2/10, wouldn't recommend.

Vouch for this method.

That's bullshit. Nothing will increase your IQ and your success doesn't rely on IQ. The claim that people don't use 100% of the brain is also bullshit that was advertised by movies.

Your success depends on how much time you put on learning and literally nothing else. People waste their time on games, social media, YouTube and other stuff that takes away your time.

Unk0wn - February 19, 2019, 12:55 pm

Tried it, instructions unclear fucked my hamster. 1/10

DrDoof - February 19, 2019, 12:56 pm

This is painfully cringeworthy

Huh?

Why would I ever do that? That's just plain rude. I don't even know how to program a website. It would also be a waste of time.

I'm sorry if it's that serious. I just found this online

Bill Gates - February 19, 2019, 1:15 pm

I do not endorse this. Not at all!

Black Hat - February 19, 2019, 1:20 pm

Hi my names Garret I've been using Reviva for 2 weeks now and the results I've seen so far are just

incredible, this product is unlike anything I've ever used in the past I tried other products from people like Alex Jones and they just did not provide the same results.

After the first week I could bend spoons by just staring at them.

Week 2. I developed mind control abilities and could make any women do exactly what I wanted.

After Week 3 I was communicating with the dead and a whole range of other shit.

This has got to be the stupidest thing I've ever seen. Any chromosome collector that falls for this needs to stop and get tested.

Why do you automatically think it was me. Why would I do this? It's retarded, and yes, It was pretty stupid of me to make this thread, I just thought it was real, but it wasn't.

The only thing that has improved my way of thinking by a certain degree are psychedelics, and I don't take em anymore.
