Thread: [edit any text in google](#)

ozuna36 - February 20, 2019, 9:09 am

hello friends greetings to the whole community I am new here my name is Ozuna very much with everyone I present you an easy way to edit any text in google it is easy to control shift + i then go to console and click this link that I will leave here
document.body.contentEditable = true

once you paste that link in console, enter and you can edit any text of google greetings to all

I am sure it isn't which is hilarious.

Vincent - February 20, 2019, 9:27 am

Isn't this just inspect element?

Xphile - February 20, 2019, 10:03 am

He's made another thread asking why it returns to normal after he refreshes.

God I hope this is a joke. ???

Why do you have a btc purse you work with cryptocurrencies ???

GrandpaSherman - February 20, 2019, 10:15 am

wow didn't know about this thanks OP.
Can I use this to make my own website?

ozuna36 - February 20, 2019, 10:17 am

what I publish is not a black hat, it is only to do simple tasks for students who want to take A in their exams by updating as before if they did not like my publication I apologize to all.

Not particularly, I have it there because I'm poor as fuck.

Good luck with hacking the Googleplex. ?

Yes he work with BTC and i work with ETH.

gianni - February 20, 2019, 10:21 am

I really hope this a joke or I might end my life because of how stupid you are.

I work with ether and some cryptocurrency faucet if you wish we can help my friend

(Feb 20, 2019 11:19 AM)flavoral Wrote: [\[CITE\]](#) Yes he work with BTC and i work with ETH.

could you help me with some ethereum faucet or some bot that you have or some strategy
