Thread: [\[Shopify Dropshipping\] Make More Money With Simple Up-Sell \(NO APPS NEEDED\)](#)

Mr.Motivation - February 21, 2019, 2:20 am

As I mentioned in my [last thread](#) how important upselling is and increasing average order value.

I'm going to show you the most simple trick but it still converts and it's good to have because then you have up-sell in place even this is not the most advanced one, but up-sell is a up-sell.

Most of dropshippers offer Free shipping which makes others to do the same so we would have at least as good as offer as competitors.

But adding couple different options for paid shipping along side of free shipping is great up-sell to have where you up-sell the shipping method.

even the shipping methods don't actually do anything different than the free one we still list them there with other "benefits" like so:

the standard shipping is Free shipping like you promise that there is free shipping (you could also call this just "free shipping") and then i have "plus shipping" in place which is 4,99\$

some people actually take the paid option instead and there you go you just made easiest up-sell ever without any apps or complex strategies needed.

hope this helps!

I recommend also reading my last thread about average order value [HERE](#)
