I have 2 Billion emails and contacts information in my Database.

Doctors, Porn, Lawyers, Multi-Level Marketing, Real Estate, all kinds of interests a states.

The list should be Marketed at \$497, discounts for more and increase in commission. Make an offer.

Payments via Paypal or Cryptocurrency.

About the lists. A partner and myself were starting a Cell Phone Company and we purchased every list we could find. We spend \$250,000 on working to aquire these lists. The company was sold off and we didn't transfer the Email address as we purchased with our own money and not company funds.

The Lists are 100% legal. CAN/SPAM compliant.

How much could your customer make if the sold 1 item at \$5 to 0.1% (1/10 of 1%) = \$25,000

So, don't you beleive they would think this is a good investment?

To make \$5000 you only have to 40 Sales. I pay at close, payment and clearing of each sale.

I can ship the list by DVD with Bulk Send Software, SMTP Server Software, and Email Verifiers, and other tools. Plus, I will include best practices to stay legal and CAN/SPAM compliant as well as getting the most from Email Marketing.
