Avoid selling items to this user, he has been caught leaking numerous paid products offsite including one of mine.

I only sold my product to a few members, which he should've known which makes it easily trackable to that he leaked the product.

You may ask for proof of how I know. Genie purchased my ebook and was also in my group Samaritans, I have numerous chat logs with this user, which links his HF to his offsite contact, including him asking me about his posts ETC.

Edit: Just confronted the user

What's with all these BM people lately? Talk about a real piece of crap man.. "I leaked it because I thought it wasn't yours anymore" what a joke.

Some people don't have any self-respect. Good thing that you let the community know what's up with this user.

It was shared on a private group. So not leaked to the public really. Also, your tos never said, "don't leak/share". Make a better product and people will not share/leak it.

But yeah, I can confirm that's me. So, let's make some drama on HF how you ebook sellers are making money only with selling ebooks. You should look at this as a free marketing for your products.

The only thing in your comment that doesn't make me want to cringe hard is the fact that you admit that you've done it.

Quit these bullshit excuses man.
