Thread: [Auto-Crypt | Web-based | C | Support for .NET | AVCheck.net Scanner | 3 Years running](#)

C3r34IK1ll3r - February 21, 2019, 7:58 am

[Auto-Buy](#)

Registration: -SNIP-

To register you need to fill your contact jabber and make payment of at least 40\$ via Bitcoin to confirm registration.

After payment you will receive account login data, all received amount will be on balance, you will be able to use it to crypt files.

Support XMPP: masscrypt@exploit.im

About:

Crypter is written in C, has no dependencies, it provides maximum execution rate.

Correct work tested on all versions of Windows, including server OS.

Any 32-bit exe files up to 10 megabytes, including .NET Framework 2.0 files are supported.

Average time of crypt is 5-10 sec (including check on <https://avcheck.net>).

Single Crypts:

15\$ - free recrypts for 2 hours

20\$ - 6 hours

25\$ - 12 hours

You can choose plan after crypting.

During the selected period you can make free recrypts of your file. We always try to make fud, but sometimes it's impossible to make it fast.

Auto Crypt / Subscriptions:

\$ 40 - 1 day, 1 file, 1 replacement of the source file per day is available.

\$ 250 - 7 days, 1 file, up to 3 replacements of the source file daily.

\$ 1000 - 30 days, 1 file, up to 3 replacements of the source file daily.

During the subscription period, all files will be automatically checked for detections and recrypted upon detection.

Each file generates its own API URL, where you can download a clean file to your servers via crown.

If you need to support multiple files at the same time, then \$ 10 / day is added to the price for each file after the main one.

Runtime Scan:

<https://dyncheck.com/scan/id/a1fc46d2a9d04eed957dd32e12f5784c>

F.A.Q:

Crypted file have detect. What to do?

You can buy file with detect and make free recrypt later or wait when stub will be cleaned.

Information about last cleaning is given in field Last stub update.

Always carefully check result of crypt before buying.

In case of subscription first make single crypt without buying it, and watch result. Satisfied - buy

subscription, result will be same.

We do not give guarantee for 24h FUD (although we provide it virtually uninterruptedly) and service is organized so that you can always see result before payment.

How subscription works?

Subscriptions works in a fully automatic mode. After creating the subscription, upload your file and system will immediately start working.

During the subscription active period, all files will be automatically scanned on AV systems and reencrypted if have detects.

Each file have API URL, to download clean file to your servers. There is a limitation on access to crypted file by ip, you determine what ip allow to give the file (you can specify up to 5 IP). You can also always download the file manually through the admin panel.

Important: You can change original file on a subscription. On the daily plan - 1 time, on a weekly and monthly - 3 times per day.

What if crypted file does not work correctly?

First, check original (source) file on same system.

If this file is working, then to resolve problem, contact support with following data:

Task ID: specify ID or link to page with crypt.

OS: operating system on which incorrect work is noticed, for example Win 7 x32.

Original file: is checked and works correctly.

Description of problem: ...

We will check information and if it is confirmed that crypt breaks your file, we will try to fix problem.

If we can't to do this, we will refund to your account balance.

Can I return money from my account balance?

Yes. Write to support from contact, to which account is registered, request refund and indicate reason.

Is there API for single crypts?

Yes.

martianhax - February 21, 2019, 8:21 am

any vouch copy? thanks! :)

Have you considered that perhaps you are a kid who aren't on other forums where people avoid shitposting and spamming a thread with 10 posts per day?

I know that you are a childish kid who aren't on forums that vet out low quality kiddies. It's not that difficult to tell.

Feels like you are hitting on me.
I am not into boys normally but i can try something new with you.

C3r34IK1lI3r - February 24, 2019, 9:54 am

We are still ready and working.

Yes, however we only conduct deals through contracts.

kauf - March 3, 2019, 5:54 am

can you explain better when you say recrypt within 2hrs? does it mean every crypt are not unique and are meant to be detected within an hour?

C3r34IK1ll3r - March 3, 2019, 6:08 am

(Mar 3, 2019 06:54 AM)kauf Wrote: [\[CITE\]](#) can you explain better when you say recrypt within 2hrs? does it mean every crypt are not unique and are meant to be detected within an hour?

Every crypt is unique, we are using a polymorphic engine.

Stub is shared on single crypt plan, if the file is detected, you can recrypt for free during the selected period of time.

With subscription, your file is automatically recrypted upon detection.
