Thread: [Fun Fact - Most common weak passwords in use today!](#)

The Social Engineer - February 21, 2019, 8:24 pm

Do you know what the top 20 weakest passwords in use are? Dare to take a guess at the top 5? The results may surprise you.

DISCLAIMER:

This count is a compilation of a handful of HUGE (80 million to 800 million accounts) database leaks that I have come across over time. I have since removed any references to usernames and other critical data from these and now only use it as massive password library for dictionary attacks during pentesting. I am not giving this library away, sorry ?

Take a guess, post it in the comments below, then click the spoiler to see the results!

Click here to see! ([Click to View](#))

****note that this probably only accounts for less than 10% of accounts in existence.**
Code top 20 commonly used passwords in the world:

#) # of accounts password

- 1) 5,248,067 123456
- 2) 1,909,336 123456789
- 3) 1,349,896 qwerty
- 4) 1,014,037 password
- 5) 788,055 abc123
- 6) 776,365 111111
- 7) 769,718 12345678
- 8) 693,655 password1
- 9) 669,774 1234567
- 10) 642,540 1234567890
- 11) 613,745 123123
- 12) 572,249 12345
- 13) 542,497 000000
- 14) 506,527 1q2w3e4r5t
- 15) 422,323 iloveyou
- 16) 361,118 qwertyuiop
- 17) 335,071 1234
- 18) 300,584 dragon
- 19) 298,477 monkey
- 20) 280,248 123456a

nullvo1d - February 21, 2019, 8:30 pm

society doesnt care about their privacy

crypt - February 21, 2019, 8:33 pm

I've used iloveyou as a gift for accounts to my fiancée. Never were changed. I guess I'm a victim to that one haha.

Bipo - February 21, 2019, 8:37 pm

This is very good, let them do ;)

Black Hat - February 21, 2019, 9:29 pm

remember when life was simple and you could have the password 123456 for everything, those were the days.

PerfectStorm - February 21, 2019, 9:44 pm

Who would have guessed "password1" for example? why would so many people use that password. Strange.

Truth be told, there were close to 90 million accounts that had either a blank password or " " as the password. I decidedly omitted these as I could not confirm if these were disabled accounts or a mistake during processing. IF those were actually set on those accounts, then technically - with a majority of users being a lazy bunch - don't set passwords when not enforced. ?
