Thread: [Small favor in exchange for bytes](#)

The Social Engineer - February 21, 2019, 9:10 pm

Very simple favor:

Sign up to the following site with [my referral link](#) and I'll give you 10 bytes after confirmation. I believe that this requires a Gmail account - I'm not sure if other accounts can be used.

For confirmation - Reply to this thread with "It's Done" or something akin to it, then send me a PM with the first and last name used in your gmail account (This is the only thing that is shown to me in my referral list, NOT your email address - for security). DO NOT post that information in a thread reply!

If you don't send the PM with the above information, I can't confirm anything and can't send you the bytes.

I usually send bytes out within 24 hours.

?
