^ this link is for the CF resolver, different types are:

cf = Cloudflare

psn = psn resolver

geo = geolocation

skype = skype resolver

and a lot more.

API LINK: [https://network-deck.ml/api/tester.php?key=\[KEY\]&type=\[TYPE\]&data=](https://network-deck.ml/api/tester.php?key=[KEY]&type=[TYPE]&data=)

Replace [Key] with the key given:

replace [type] with the method of data to resolve:

Cloudflare = cf

Skype = skype

PSN = psn

Geolocation = geo

Port scanner = port

IP 2 Site = ip2site

IP Logger = iplogger

Who is = whois

example = [https://network-deck.ml/api/tester.php?key=\[key\]&type=cf&data=](https://network-deck.ml/api/tester.php?key=[key]&type=cf&data=) / Cloudflare resolver

Free API:
