Does anyone know who runs rocketr, or if they're a member on the site.

Serious question.

Orgy has parted ways. It is King of Hearts and Alex (forget what his username is) now.

Thats interesting, do you know the reason why?

Rob wanted to dive deeper into the crypto scene and use rocketr as a platform to push only crypto payments. KoH wanted to approach rocketr more like traditional payment processors with banks, PayPal, etc.

It's what happens when you have two people with dramatically different views of the government and money.

That's understandable from both parties and probably a better option he left so he can pursue the former.

He just does community stuff / anything that requires interacting with a person. KoH runs the show.  
Edit: Unless very recently KoH stepped away\*
