Some are probably known and some probably aren't.

On instagram there are accounts that will shout you out in exchange for "revealing" pics of your e-girl/e-whore, don't send nude ones even if they say its a requirement because instagram will disable your account. I reached 2k organic followers in 1-2 weeks with this method.

Discord (believe it or not) has an awesome platform called disboard that lets you grow your discord server fast, I recommend making a NSFW / Porn / Snapchat server and promoting it through disboard, once you get to a good amount of members promote your girls porn video / snapchat or twitter or whatever the heck you do.

If you'd like to grow your e-whores/e-girls snapchat fast don't be afraid to send nudes / trades with guys. Even mention it on your dating / porn-site profile and you'll be getting a shit-load of adds in a day ?

Using a VPN you can add your geo-location to snapchat using "our story", use this on a US vpn and watch the adds roll in.

There you have it. Enjoy yourself.
