You do realise people who bought it using the old thread still got access?

Could you stop sales thrashing and provide some actual proof about your claims?

You just posted a bunch of threads I closed for a reason.

your new customers will surely go through the threads and know how desperate u on here to rip people of their money and i hope u can build a house for ur family with the new \$15 jackpot u get from me on this your scam thread wish u good luck son

M?xim - March 5, 2019, 2:35 pm

God. How can you spent time making a keylogger and then not listing the features & functions? Or at least take screenshots of the GUI and let people figure out the functions themselves. "Fully

secure, 100% hidden" - sure, but explain what functions makes it so.

Seems like buying your keylogger is like opening a mystery box, you have no clue what you're getting.

Are you calling me a scammer because there is no builder for the keylogger yet?

It doesn't even say in the thread that there is a builder for it so quit sales thrashing.

Everything the keylogger does is in the thread. There is no builder, why can't people understand lmao.

Okay it has no builder, so what you can still list the functions enabled on the stub lol.

Thread designs tell you all features:

Including:

Keylogger

Password Recovery (7 programs/browsers)

Hidden

It's stable and it's Native C++ which makes it compatible with almost all crypters.

Grab cookies & history.

Works on all Windows versions from Windows XP and up.

So no add to startup, log interval, assembly changer, icon changer, logs encryptions, clipboard logger, SMTP/FTP, unicode support, system info, fake messagebox, more?

Detection rate?

Stub size?

That's what am meaning with more info.

There is no GUI though.. it's a singular build. He sends you the Keylogger after you send recovery details and then you start receiving the logs

Well, if you would've asked me if there was a builder or not, we wouldn't be talking.

Also if 15 USD is nothing to you why open a scam dispute where you bullshit with "yeah he scammed because he didnt tell me"

It didnt even say in the thread that there was a builder and i didnt say it either.

You get unlimited builds so you dont pay per build. Just stop DMing me and don't @ me ahain because I'm losing brain cells.

You aren't gonna get your money back all sales are final.

I only use HF for business so if you write to someone else on any other platform it's a scam.

Illyrians404 - August 12, 2019, 8:01 am

I don't understand what the product is here, is this a website based logger? do i receive my logfiles on your panel website or on my own email, does this product have it's own builder and reader i mean there is so little go to by here informationwise??

codesploit - August 13, 2019, 12:20 pm

is there a reason the builder is not included in the deal process, cause it is tiresome to always reach out to you you to
generate new bin for me incase my domain/ ip changes, email changes or even i decided i have had enough of the
old bin.

DrSpy - August 28, 2019, 5:12 pm

No builder screenshots? no delivery details? how am i suppose to know the features of the builder and how your software deliver the logs?

SIM-4330802 - August 30, 2019, 12:53 pm

please confirm to me. if it steals from outlook, thunderbird, foxmail etc

inkredibleandy1 - August 31, 2019, 11:12 am

Hey bro, very much interested. What I don't understand is the pricing and how you wrote the figures.

F11 - September 3, 2019, 2:50 am

Do we crypt it or is there a built in crypter or something? Sorry just confused.

maxlifted - September 11, 2019, 2:40 am

How will you expect your customers to be contacting you each time they want a new stub/bin? By so doing, you are getting yourself stressed out and there by wasting your customers time during the period of waiting for you to attempt to each person. Make the builder accessible in any of the packages you offer and let us have a look at the demonstrational video or the screen shots at least.
