Thread: [PhoneBomb - Call flood - Real Calls - Phone Bomber - ALL COUNTRYS](#)

phonebomb - February 24, 2019, 7:26 am

I would like to introduce my callflood to you today:

FAQ:

As number format always enter the country code without + or 00.

How often to call: How often should he call every X seconds.

Duration: How long should the flood run total: X seconds

The price is calculated from the number and duration of the calls.

The Flood starts after 1 confirmation from Blockchain network (Soon instant),refresh the page then you will see when it starts.

What can I use this for:

For example In order to stop annoying vics, this also makes WhatsApp and co difficult to use because you can not hear any voice or write.

To annoy friends or acquaintances

I do not know what you think.

* My suggestions are of course all fun and you should use phonebomb only for pentest purposes with permission.

Should you find any gaps or big bugs we will pay you a "bounty"

Plans:

1 Hour - 30\$

2 Hour - 55\$

3 Hour - 70\$

For custom plans PM me.

[\[contract=tid\]Buy Now\[/contract\]](#)

*Fixed some Bugs

*Please dont forget no 00 or +43 Country Code just the code like 43 and the number example 43123456789.

*Hope You enjoy it please get us some feedback to work more on it.

I'm pretty sure I just got robbed.

Things_NOT_ to do while ordering from this service.

1. Do not add country code to your order.
2. Do not read the FAQ.
3. Be rude.

This guy did all of the above. Don't be like him.

Sword - March 2, 2019, 3:11 pm

Things not to do on HF.

1. Beg for fake vouchers
2. Ask me to remove my review.
3. Spam my inbox.
4. Advertise any selling site.
5. Deal without a contract.

5. Deal without a contract. Wasn't that you begging for 60 cents? I asked once if you can edit your review when you clearly lack the skills of basic text comprehension.

Moreover, I came out of the way to redo his order without even charging him a single penny.

Velial Squad - March 2, 2019, 4:35 pm

do you offer a text spamming service for multiple phone numbers? :)

other than that i just sent the btc and put the correct format, lets see if it spams

(Mar 2, 2019 05:31 PM)php Wrote: [\[CITE\]](#) So with the new contract system, you can advertise the service like this thread does, but without the URL? Once the contract has been complete, then you can provide the URL via PM or something?

What if it's not within the marketplace, like within my signature or user title?

yeah i think thats how the new thing works, it kind of downgraded the marketplace imo

Edit: this worked lol. i definitely will be using this a lot haha

one thing, i just wished it was a little cheaper per minute
