Thread: [Apex Legends Coins for Cheap PC](#)

Ram - February 24, 2019, 6:20 pm

I have discovered this site with mad cheap Apex Legends Coins for PC

Prices seem to be unreal, but I think they are done through Alibaba Cloud method which offers Chinese people to get them for extra cheap.

I did some reading on the site and they seem to be legit.

So, is there anyone out there who wanna try? :O

If it's legit why are you asking somebody else to take the risk?

if you read a bit deeper you will see lots of scam reports , highlight anything within past week or two on Google, you will see people complaining about purchasing the literal product you linked.

Interesting would be pretty lucrative if they can do it all on time.
