Thread: [Best Crypter of 2019?](#)

raghavsood999 - February 24, 2019, 6:44 pm

Hello, i am looking for a crypter with all features that cyber seal and byte crypter V3 offers but with hidden start up, hidden hkey, regkey, hidden from msconfig, process tree and hide file/folder option, also option for usb spreader which uses .ink method and not the old autorun . inf method which doesn't work anymore. I need a life time version.

It can be expensive. Maybe over \$40.00 and i will buy it.

WhatTheLeak - February 25, 2019, 12:41 am

Remember, as more features you wish, as detectable it gets and as more expensive it becomes. I prefer close-to-zero features (just a few important ones for you) and a good undetection-rate. Doesn't even need to be FUD a long time, you won't get a long-lasting FUD crypter anyway for 40\$ (a month?). I loved CyberSeal back in the times, and Data Protection, but Flow Crypter seems fine too.

Ghost_Zarqa - February 26, 2019, 3:56 am

hi man

any good rat like NJrat do u know?

because it very hard to crypt it now all AV can catch it ez pz

raghavsood999 - February 26, 2019, 6:55 am

i was looking for a native crypter and flow crpter uses java dependancy and your remote pc need java to run the file thenn flow cryoter not for native files or for those who wish to crypt babylon rat server and use on native pc

indetectable - February 27, 2019, 9:03 am

I would just like a crypter fud (minimum 85%),

seriously, it's been 4 months! I am looking for one and I can put 180 euros.

If you know who sells it, please, it will help me a lot !

Please

By the way, my virus is created with nJrat lime edition 0.8.0 and so it is in .exe

darknight0147 - April 3, 2019, 4:17 am

who has a good idea of very good crypter.. any sugestions. thanks???

Hopsin - April 3, 2019, 7:54 am

Luxury Crypter IMO. 1 free copy is given in the contest I provide.

PusherClear - May 3, 2019, 1:14 am

oh, i know an answer for that, MAKE YOUR OWN

HHHOH - May 16, 2019, 12:37 am

hello bro, is flow crypter native?

AntonGigabit - May 16, 2019, 12:40 am

Well It depends on the needed use. I haven't been here long but there seem to be trustworthy sellers.. I am interested too.

It does crypt native files, but I don't know about the language it's written in.

try d4rk coders rat its open source

Five5s - May 17, 2019, 3:05 pm

Depends on your usage but in terms of the most high end I'd say NTCrypt / TitanCrypt!

SIM-3432714 - June 8, 2019, 11:10 am

Better quality crypts: Titan Crypt, Prime Protector, Frenchy's crypting service

Sojarich2019 - June 26, 2019, 7:37 am

can anyone offer a private crypter RAT/Keylogger to .pdf exploit undetectable

th3Mistery - June 27, 2019, 2:53 am

Do not waist your time with Aspire, its the most Shitty stuffs on HF.

yeh Odayexploit crypetter is your solutions its best yet

Zuwop Beats 21 - January 15, 2020, 9:02 am

what rats work with byte crypter?
