Thread: [\[NEW\] Advanced Custom BustaDice Script | Proven Profitable | Private | AUTOBUY \[2019\]](#)

Demonata - February 24, 2019, 7:20 pm

Hi I am tired of seeing all these bustadice scripts that never seem to make any money or have not had hours and hours put into it unlike my fully custom script. I'm not going to waist my time with making a fancy thread with all these fancy pictures etc to sell this since I use the script so I really don't care how many people buy it or not. It's a custom long script I made that is 100% custom and longer and always can make profit. I'm not worried about saturation since I doubt the site will close. It will 100% make profit and any help you need you can add me on discord. I will help you post the script and also answer any questions you may have on it. You can't run it 24/7 since there's always 99% chance you lose some profit unless you do have a big enough bit bankroll. If you can afford at least a 16k bit bankroll which is around \$60 you will always make profit even if you leave it running. Just be sure to stop it when you make around \$10-20 profit and cash out constantly because you never know how long until that 1% chance of losing happens. I will say it's the most advanced script there is because I fully customized it. Took a very long time to make. I am also only selling for \$30 since I don't really care how many people buy it. Whoever buys it will make money guaranteed.

Here is the link to purchase it. \$30 <https://selly.gg/p/f8be19e5>

Payment Proof Below

FAQ:

1. If it works, why are you selling it?

It can't be saturated and tired of people losing money.

2. How much have you made?

I made way more than I lost as you can see by the payment proofs

3. How fast is this script?

Depends on website speed, computer and internet speed.

4. Should I use different accounts and IPs.

Why should it matter if you use regular IP.

6. Will you run this for me or do this for me if I give you a % of profits?

No since it's easy for you to run it yourself.

7. Is it actually really custom and had to code and work hard on it?

Yes fully custom and has a very advanced method to using.

8. How much start up money do you recommend to start running the script?

At least \$60 to make safest profit.

9. Why is your thread not have pictures and everything to increase buyers?

I don't care if anyone buys it or not but it is the best script out there.

Did a lot of testing to get this script right though. I've withdrawn tons of times though and all pretty recent. It's the best and most advanced script available that I coded myself amd did a ton of tests that lost a lot of money till i finally got it right.

Not running it right now. Like i said it took a lot of testing to get it right so my account is in the negative so no point in saying it until after purchase. I dont really care about the money. That's why I'm selling it so cheap. Just tired of all these bustabit svripts that atr super short and not coded a long time like mine. I guarantee mine is at least 50x lomger than any you've seen smd is more technically made.

My payment proofs speak for themselves. I'm a straight shooter. Not going to beg for reviews or do everything possible to get sales. Also not going to have someone that hasn't payed watch me running my script and see a strategy I'm using and try to copy it or make there own. It's only \$15 and works and is the best there is. I should sell it for over \$100+ but it can't be saturated and I just want everyone to make money but of course not going to give it for free.If I cared about tons of sales I would make fancy thread and put smiley faces and everything everywhere and pictures.

If you don't care about the money then why not give it away for free? Don't repeat with the "I am doing it for you, guys" bullshit. You basically have no proof to show because your Bustabit's account is negative. And I wonder if the \$15 was set intentionally so you could buy another 6-months L33T account for your scam rampage?

Since i worked on this script a long time. I can do with it what I want. Why would i do all this hard work coding it and give it for free. I posted payment proof. Yeah my account is in the negative since it was for testing the script. You can't automatically be in the positive when you are making a script kid. I have never scammed anyone. How about you go sales trash another thread. I'm reporting you to the mods.

Cuban - February 25, 2019, 7:19 am

Big vouch for Demonata, talked with him before about different things and he's a knowledgeable guy! Wouldn't hesitate to work with him and purchase this script, definitely looks better than the other scripts that are about. Will post back here with earnings from the script when I get them.

And the "proof" in your thread means nothing. You could have got those payments from anywhere. Let's put that to side as well. How about you make a demo account right now, run your script on it and show us some real proof with a link to your Bustabit account? That won't happen, now would it? Because you obviously don't care. Or it's not worth your time. Which is what a scammer would say.

And if anyone else is reading this, the fact that this guy is lying is that he doesn't even know there is simulated balance option in Bustabit. It's made specifically for those who want to test out their script without spending real bits. So either OP is retarded to use his actual balance or the obvious; a scammer. Even if there is a script which can be made in a minute, make sure he shows you a demo account with his script running over Teamviewer.

Looking at your history all you do is bet on 5x with no multipliers... is this the script? If not, why doesn't your history show differently?

Nope that's not the script at all. Just a very small part of it. It does way more than that. You wont figure it out just by looking at some history. It is the most advanced bustadice script there is and longest.

I tried this about 12 hours ago before I almost passed out asleep. I let it run for just under an hour and admittedly I didn't start with the amount Demonata recommended, but it's still working fine for me despite that. If you enjoy bustadice but you're sick of shitty scripts or losing manually, invest in this.
