Thread: [On button click, add current time and date to txt file in web](#)

Formula 1 - February 28, 2019, 12:59 pm

like the title say

when the button is clicked i want it to send the current date and time to txt file (log file)
also userTextBox.Text, so i can see it in this format

username: HackForumsUser

Date: 28/02/2019

Time: 20:58

And then when i click the button again, i want it to add the new one after the old one for example:

username: HackForumsUser

Date: 28/02/2019

Time: 20:58

username: HackForumsUser2

Date: 29/02/2019

Time: 22:58

username: HackForumsUser3

Date: 22/03/2019

Time: 21:58

Who Soup - February 28, 2019, 1:00 pm

I gotchu, posting to update later.

EDIT:

Things Needed:2 Textboxes

2 Buttons

Imports system.IO

Publicly declare: Dim los As New List(Of String)

Add Button:

```
Code Dim packet As String = "Username: " & TextBox2.Text & vbNewLine & "Date: " & Date.Now &
vbNewLine & "Time:" & TimeOfDay
    TextBox1.Text = TextBox1.Text & vbNewLine & packet
```

```
        los.Add(packet)
Save Button:
Code File.WriteAllLines(Environment.CurrentDirectory & "Saved.txt", los)
Full Code:
Code Imports System.IO
```

```
Public Class Form1
```

```
    Dim los As New List(Of String)
    Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
        Dim packet As String = "Username: " & TextBox2.Text & vbNewLine & "Date: " & Date.Now &
vbNewLine & "Time:" & TimeOfDay
        TextBox1.Text = TextBox1.Text & vbNewLine & packet
        los.Add(packet)

    End Sub

    Private Sub Button2_Click(sender As Object, e As EventArgs) Handles Button2.Click
        File.WriteAllLines(Environment.CurrentDirectory & "Saved.txt", los)
    End Sub
End Class
```
