Thread: [Regarding the history of HF](#)

Lifeyz - March 1, 2019, 5:47 am

I registered on this forum back in 2015 and was an active lurker for a couple of years. I posted a few threads and added some comments here and there. Since 2017 I have rarely even visited the website.

I've noticed a few changes since then and it made me quite interested as to what caused them. F.e. I have noted that the reputation system has been removed(?) or renamed(?) to "popularity". Past reputation points have also been removed. What happened?

I also vaguely remember HF being attacked(?) and consequently suffering some serious downtime some time ago. Story?

I hope someone can bring some clarity to my questions. Feel free to include any additional major changes I might have missed.

Thanks in advance,

Lifeyz
