Wow hacks look epic. It's out of my budget though, if I may ask what programming language did you use to develop it? :) Thanks!

I'm interested as well! I'd be happy to write a review as I've done for a few other cheats too. Shoot me a message either way!

EbonCipher - March 8, 2019, 11:24 am

Still selling this! We will be removing the one- day subscription option very soon so we can focus on providing a high- quality cheat to our long term subscribers. Now would be the chance to try this out while the lower price plans remain available.

Time - March 8, 2019, 11:46 am

I can vouch that this aimbot is amazing :) GLWS
The support is great too might I add.

EbonCipher - March 16, 2019, 8:00 pm

HWID Spoofer included since EAC hwid bans?

(Mar 16, 2019 08:47 PM)Reporter Wrote: [\[CITE\]](#) HWID Spoofer included since EAC hwid bans?
Yes, we provide a method to unban if you have a HWID ban already.

EbonCipher - March 18, 2019, 12:54 pm

Cheat has had a little upgrade. Silent aim (psilent) mode is now added. It makes the aimbot completley invisible to anyone spectating you. This feature can also be tuned to your preference with smoothing options etc. PM for more info.

Cantaloupe - March 19, 2019, 11:05 am

Just added: Full support for Battle Pass Season 1 Update

EbonCipher - March 19, 2019, 7:26 pm

Currently online and selling time. The hack has been updated to include a free HWID spoofer for those who have been banned previously using other cheats. The spoofer is built right into the cheat loader and doesn't require any extra work from your side. Simply load up and play!

LoveToHax - March 19, 2019, 11:16 pm

I've used 3 different hacks, and this is the best. The seller is responsive to criticisms and updates are consistently improving the product.

This is better than Zenith and Koryo, if you were looking for either of those. The stealth mode and HWID spoofer are just the cherry on top.

Looks like a solid piece of software. I don't play Apex, but as a coder of aimbots for a few different games, I'm impressed.

GLWS.

Thank you for the nice words. I put a lot of time into making this solid. I think any developer can relate to the blood sweat and tears that is software development ?

Yes the cheat is slotted, but have since opened this to more slots (20 total) ?

SIM-595622 - April 22, 2019, 11:45 am
So, is the silent aim client side only, does spectators see the actual aimbot?
Could you upload a video with silent aim from a spectator pov?
