Thread: [Spix-|GET mysql username and password|- Challenge](#)

Ramb0x - March 2, 2019, 12:34 am

Hi.

Today i prepared for you a challenge.

Who ever get the config file for this gets +rep from me.

PHP Code

```
<?php
```

```
http://balade-pierry.fr/
```

TASK: Write down the mysql creds for mysql login here.

SOLVERS:

- K0eN

- Fishsticks

-

Picture of file:

Post it here like that.

Good luck. ?

Teferi - March 2, 2019, 5:13 am

Fun challenge, I've send you the solution.

3 replies is enough dipshit

Fishsticks - March 2, 2019, 5:42 am

Cool challenge, I've got a bunch of files, but still haven't found the right directory, and now I need to take a dump so I'll be back on it later.

Got it, but I can't send PMs or post images, so here's the code:

PHP Code

```
<?php
/**
 * Constructeur
 *
 * <p>création de l'instance de la classe. Récupère les paramètres
 * de connexion à la base de données, lance la connexion à la base de
 * données, exécute la requête.</p>
 *
 * @name myConnexion::__construct()
 * @param $query
 * @return void
 */
public function __construct($query) {
    $myConfig=new myConfig();
    try {
        $myParams=$myConfig->setMyParams("localhost","balladepierry","REDACTED",
"REDACTED");

        //$myParams=$myConfig->setMyParams("mysql5-7","REDACTED","REDACTED","REDACTED");
        parent::sqlConnect($myParams[0],$myParams[1],$myParams[2],$myParams[3]);
        $this->resultat=parent::query($query);
    }
    catch (MyException $e) {
        echo $e -> getError();
    }
}
```

Yo, added yo to the list.

Fishsticks - March 2, 2019, 6:29 am

Is this yours? I'm getting carried away and about to persist stuff

Ramb0x - March 2, 2019, 6:31 am

Wut, ofcourse its mine :)
