Thread: [Best Paid Rat With Windows Defender Bypass](#)

Amenazzy - March 2, 2019, 9:58 am

Im Looking For a Paid Rat, Dont matter if you have to portforward. but bypass windows defender. ?

Exodus - March 3, 2019, 8:20 am

Just get a private stub crypter and you should bypass WD just fine.

My comment wasn't aimed at you, just the idea in general?

The best way to bypass it is to control how it reacts to your files. For instance powershell cmdlets like excluding files/folders etc from scanning will make your life much easier. It is not hard to interact with defender to control its response to the malware.
