Thread: [Feature to see the amount contracts linked to a thread](#)

flavoral - March 2, 2019, 1:25 pm

Ok so here me out, a feature located in the top right of the OP of a marketplace (similar to the "contracted customer" feature).

However, when you click on that one, it goes to a page showing all the contracts linked to that sales thread (similar to the marketplace contracts page of a user), showing the amount of total contracts, amount of unique contracts and the 2 parties of each contract.

This will help track all sales from a certain thread, and helps customers check how many people have used/bought that product as a lot of people don't post on a thread after buying which will make it difficult to know a contracted customer.

Hope i explained it well.

Xerotic - March 2, 2019, 1:27 pm

I have thought of stuff like this in the past.

"View posts by Contracted Customers" and "View contracts from this thread" would be useful buttons on a thread IMO.

These 2 features would really helpful with the new rules

King - March 2, 2019, 1:35 pm

You explained it well and I support this suggestion.

Not something we will implement yet.

...will also give a free dinner to your competition ^_^

but hey, competition actually improves things in terms of quality, at least in the real world.

Certainly a good idea but maybe improve it in terms of obscure actual, real numbers. Just something close:) it can be damaging in its current state ?

PerfectStorm - March 5, 2019, 9:06 pm

That sounds like a perfectly good idea to me. Like it.
