Thread: [\[Homework\]Cant gain access to last two systems.](#)

SIM-3889772 - March 2, 2019, 5:21 pm

My tasking was to exploit this gateway and use it to pivot to other machines to obtain some files. I have had no luck with exploiting either gateway but have checked every other system for the required file. Any pointers to potentially help out? Mr. Robot and I have been at this for days. Have tried brute forcing, hail mary against it, etc..

Enumeration is key:

Try enumerating the gateway with nmap "nmap -T4 -A -v -Pn --script vuln".

You can share your results here for further help
