Someone correct me if I'm wrong but I don't think cash app works with prepaid cards. I've had enough would-be buyers tell me so anyway.

Dr.Valestia - March 2, 2019, 10:14 pm

Try Paysera , cause PayPal isn't accepting Payoneer anymore , and they're following each other's steps.

i tried it on paypal it just says the bank account and then just tells me try again later and it wont work. ill try it again. i think i read online that it only works if you add the debit card first.

yeah it just keeps telling me try again later. fucking bull shit

holy fuck. fuck no. i tried that app its fucking garbage. literally requires more identification then ive ever seen. not to be a dick but why would you even suggest that?

bruisedwitch - March 8, 2019, 11:36 am

Yeah man, cash app doesn't accept prepaid cards and that constitutes as one. I have a bunch of them and I have been trying to link them to a new cash app account as a debit card to no avail.

They're getting a lot more strict lately about account verification and fraud etc.

my accounts are getting banned quicker and quicker and I don't even scam people or anything like that.

Legit the only thing that works for me is to go out and get another debit card from a bank. such a pain in the ass. and they have been asking me to verify my ss quicker and quicker too.

im a dumb fuck and keep adding blacklisted banks and cards to accounts getting locked out of them. literally no way besides just getting a new bank account.

if i get one more account that has no problems im literally doing nothing besides adding a bank account taking payments and withdrawing lol
