Thread: [VB.NET How to get DirectoryPath of running process?](#)

Formula 1 - March 3, 2019, 6:12 am

How can i get the DirectoryPath of running process? not my application...
Another application that is running...

HFDone - March 3, 2019, 8:50 am

process module property filename

<https://docs.microsoft.com/en-us/dotnet/api/system.diagnostics.process.modules?view=netframework-4.7.2>

Vexallus - March 3, 2019, 10:04 am

```
Code Dim x As Process() = Process.GetProcessesByName("TEST")
```

```
Dim modulepath As String
```

```
modulepath = x(0).MainModule.FileName
```

(Mar 3, 2019 11:04 AM)Vexallus Wrote: [\[CITE\]](#) Code Dim x As Process() =

```
Process.GetProcessesByName("TEST")
```

```
Dim modulepath As String
```

```
modulepath = x(0).MainModule.FileName
```

It gives me the path + filename.exe

folder/folder/file.exe

I just need folder/folder

folder/folder/file.exe

I just need folder/folder

you can use .Replace which will output the folder without the file name

folder/folder/file.exe

I just need folder/folder

```
Code Dim allPath As String = "C:\Windows\explorer.exe"
```

```
MsgBox(IO.Path.GetFileName(allPath)) 'Return "explorer.exe"
```

```
MsgBox(IO.Path.GetExtension(allPath)) 'Return ".exe"
```

```
MsgBox(IO.Path.GetFileNameWithoutExtension(allPath)) 'Return "explorer"
```

```
MsgBox(IO.Path.GetDirectoryName(allPath)) 'Return "C:\Windows"
```

```
MsgBox(IO.Path.GetFullPath(allPath)) 'Return "C:\Windows\explorer.exe"
```
