yes

Kavr - March 3, 2019, 3:23 pm

what's the difference between PRIVATE BUILDER and "standard" one,
the 80\$ one is not fud ?

Tee Plow - March 3, 2019, 3:25 pm

(Mar 3, 2019 04:23 PM)Kavr Wrote: [\[CITE\]](#) what's the difference between PRIVATE BUILDER and "standard" one,
the 80\$ one is not fud ?
the difference is that the private version will be with a private stub so it will be FUD for a longer time
while the basic builder the stub will be shared !

Kavr - March 3, 2019, 3:45 pm

(Mar 3, 2019 04:25 PM)Tee Plow Wrote: [\[CITE\]](#) the difference is that the private version will be with a private stub so it will be FUD for a longer time

that doesn't mean mine is rubbish !

aleksekt05 - February 21, 2020, 5:11 am

So far nothing works, not only the private builder macro gets detected by Windows Defender, if no
AV is present and it runs, the macro crashes.

I can't update the builder, it might be due to the fact that it is not activated by HWID, I am not sure
as OP isn't replying back

I am waiting for updates as soon as possible!

EDIT: the crash was due to my Windows being on a VM. The code works as intended, but is still needs a REFUD as we're speaking.

LEDIT: XLS macro is almost fud on scantime, but so far Windows Defender finds it as malware when enabling macro.

Tee Plow - February 21, 2020, 9:17 am

So OP came on inbox, I asked for a test and was given excel macro, I tested it scantime: WD, Eset, kaspersky all detected scantime... i didnt even proceed with runtime test

Owner said that was an old build, and i asked him to make a new build that bypasses avs as he claims and make a video.

If there's anyone with better results please post it here, anyway guys listen differentiate btwn scantime and runtime execution, am just helping a brother out there.

I will edit this post when he makes a video.

Hi I am kind of confused when you say Silent Macro builder. Can you explain how it is silent?

Tee Plow - April 27, 2020, 8:17 pm

(Apr 27, 2020 08:13 PM)Sup3r=B0SS Wrote: [\[CITE\]](#) Hi I am kind of confused when you say Silent Macro builder. Can you explain how it is silent?

it's just a macro exploit

Sup3r=B0SS - April 27, 2020, 8:27 pm

(Apr 27, 2020 08:17 PM)Tee Plow Wrote: [\[CITE\]](#) it's just a macro exploit

Okay thanks for the clarification. Private builder is still just a macro exploit built with my own private stub. will be back for this.

Kaveri123 - April 30, 2020, 8:55 am

Let me try your attractive product! Please correct me on the following below points if i have misunderstood

1. I can easily bind my AsyncRAT server with Word (Please let me know yes or No)
2. The output file property will be .doc and not .exe
3. The server executes as soon as Word document opens and clicks on Enable Macros.
4. The exploited file can be sent through gmail.

Please correct and explain me if I am wrong in any of the above points.

Tee Plow - April 30, 2020, 9:39 am

Stanley - June 10, 2020, 12:05 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

jason123 - August 25, 2020, 8:31 am

Am interested but would you give me a test before buying?

Send me PM if yes because i tried to PM but it didn't go.

(Aug 24, 2020 02:40 PM)steelproject Wrote: [\[CITE\]](#) Can give 1 day licence for test I see all works? I bought from someone who also said the same but he ran away with my money so am being skeptical this day

yes it does bypass gmail

Leroy Jethro Gibbs - September 1, 2020, 4:31 pm

I feel like this is the same shit thats been attempting to attack my company and local sheriffs department. Same exact format every time. Same shit as show in your video but almost always detected once extracted.

PFFFFFFFFFFFFF you are bad boy... But not a good hacker hahah, learning learning learning during

so much time like in the first karate kid? Then you can become the next big guy of your street. You burn the exploit to share with this kind of guys... Thanks?

for the private version the refud is on your request !

zombe55 - September 7, 2020, 11:13 am
Yep, I bought the version with monthly 1x reFUD. You didn't reply at all. I don't know, maybe something like: "give me 2-4 weeks to refud", but no answer.. yikes.

Private version Isn't FUD and doesn't support you when you need it. Unstable and crashes. Doesn't bypass emails.
