Thread: [Possible bug while browsing on mobile?](#)

Bacardi Cola Lime - March 4, 2019, 1:57 am

Hey m browsing HF on mobile right now and when I went to the marketplace sections, they appeared like this;

While every other section is normal;

It appears to happen on every marketplace subforum.

Is it just me or a bug?

Meow - March 4, 2019, 3:36 am

You're not the only one.

I changed the theme to deVoid, it's ugly but at least it somewhat works.

Ok, thank you! It's good to know it's not only me.

Slankey™ - March 5, 2019, 7:49 am

Never have had this happen in chrome on iOS and Android Devices. I browse mobile only.

Bull - March 5, 2019, 7:59 am

mentoles you are a die hard member, phone battery at 1% and you still keep on browsing through HF instead of charging it xD

The stress was real. You can't imagine the rush I had to take screen-shots, upload them and make the thread. All that with 1% battery. Didn't have a charger either.

I think I have experienced this before too. Weird.
