Thread: [HOW TO CREATE .EDU EMAILS for Unlimited Google Drive Amazon Prime and MORE](#)

Dr. Einyel - March 5, 2019, 9:28 pm

With an .edu email you'll get free benefits!

For example:

"Google Drive - Unlimited Google Drive storage, Amazon Prime 180 days free (and later a big discount), Google Apps for Education, Discounted Adobe CC, Microsoft Dreamspark, Autodesk Software, MindSumo, Github student, RipTiger, Office 365, RoboForm - World's best Password Manager(Like 1Password and Lastpass) \$19.95/yr FREE, AutoDesk - Get all AutoDesk and AutoCAD softwares for FREE, LastPass - 6-months free LastPass Premium Password Manager, Bitbucket - Get free unlimited user source code hosting, Fetch Softworks (Mac Only) - Free Fetch software full-futures file transfer client for the Apple. FREE, The Washington Post - Free unlimited digital access with .edu e-mail address, Apple Music - Up to 50% off, pay \$4.99/m, iDrive - 50% Off Online Backup, Connectify - 75% Off services from \$7, UNiDAYS - Free registration that verifies student status and allows participating retailers to generate a coupon code for the online discount, Student beans - Free registration that verifies student status and allows participating retailers to generate a coupon code for the online discount, Squarespace, Discounted voucher for Comptia, JetBrains, And a lot more...."

I made a detailed guide/tutorial explaining how to create your own .edu email.

Note: this won't get you a custom name like "yourname@example.edu". It will create one with random numbers, but it will be a legit .edu email and created by yourself, for your own personal use.

L33T or + used to get this for free. That's why you may read comments asking for it.

If you don't want to pay for the eBook and just want to create an .edu email for you, I offer this service for only \$1. Check my thread: <https://hackforums.net/showthread.php?tid=5948294>

You can get this PDF for only \$9.99 \$16 BTC

Price could change without notice if I run out of edits. Check my last comment in this thread to make sure what's the real price.

Idk broda. I did my research and I didn't find that many guides, just lame and unorganized information. And I just made a good explanation by myself.

Guide sent to you guys. Enjoy.

Guys I'll try to send the link to you from my phone (mobile web version).

PS: I'm not happy sending this to literally new members with <50 posts. If this is your case you should make an offer or tip bytes/btc (any amount), or simply be more active and ask it another day.

Having a .edu email has some great benefits.

For example:

"Google Drive - Unlimited Google Drive storage, Amazon Prime 180 days free (and later a big discount), Google Apps for Education, Discounted Adobe CC, Microsoft Dreamspark, Autodesk Software, MindSumo, Github student, RipTiger, Office 365, RoboForm - World's best Password Manager(Like 1Password and Lastpass) \$19.95/yr FREE, AutoDesk - Get all AutoDesk and AutoCAD softwares for FREE, LastPass - 6-months free LastPass Premium Password Manager, Bitbucket - Get free unlimited user source code hosting, Fetch Softworks (Mac Only) - Free Fetch software full-futures file transfer client for the Apple. FREE, The Washington Post - Free unlimited digital access with .edu e-mail address, Apple Music - Up to 50% off, pay \$4.99/m, iDrive - 50% Off Online Backup, Connectify - 75% Off services from \$7, UNiDAYS - Free registration that verifies student status and allows participating retailers to generate a coupon code for the online discount, Student beans - Free registration that verifies student status and allows participating retailers to generate a coupon code for the online discount, Squarespace, Discounted voucher for Comptia,

Jetbrains, And a lot more...."

Some people makes and sells these accounts as a service.

Searching on the net I found a method to create my own, but that explanation was very lame, so I made a detailed guide/tutorial explaining how to do it (15 pages), so you can make your own account without paying anything.

Note: this won't get you a custom number like "yourname@example.edu" but one with random numbers, but it will be a legit .edu email and created by yourself, for your own personal use.

If you are l33t or +, you can have this for free.

If you're a free user I will check your activity on the community first, or maybe you could make an offer for it, but I'm not interested on seelling this.

Anyway, if you want to receive a copy, just post a reply and I'll PM you.

Ouuu.

I would really appreciate a share on this technique.

Thanks for taking the time to read this.

Hopefully I pass the test.

This is the PDF/Guide/eBook thread. If you would like to now the prices for the service of me making the mails for you, please check this thread:

<https://hackforums.net/showthread.php?tid=5948294>

I do each edu email for \$1 BTC, and 1 free every 9 you ask, and other disscounts.

It would take me about 10 min each now that I have done this many times. But a person learning the method could waste 30min or more to make each account.

OMGer - March 13, 2019, 9:26 am

I'm telling you i need bulk of thousands, you give me the same price with 10% off ? What kind of business man are you lol
