Thread: [Jombah \(UID: 3899502\) Threatens to harass my family after asking for refund](#)

Threatening - March 6, 2019, 6:55 am

Hello HackForums,

I recently purchased a \$35 method from Jombah called "Fortnite Frenzy" and I'll have to admit, it really doesn't work when I tried to use it. I proceeded to ask him for a refund after a good 2 weeks of trying it, in which he calls me a "moron" saying i should go back to working at McDonalds & I'll never be succsessfull. Then i stooped to his level as well. He also gave me a -5 reputation after all that. You might be wondering, this guy claims to make thousands of dollars per month, why is he worrying about a \$35 sale so much that he has to threatened to harass my family members and myself with personal information he got from an autobuy website? Let me know if you have the answers, because the only conclusion I can come up with is that he is a broke cunt who only uses HackForum sales for money.

What kind of seller would do this? I don't think anyone should be a customer of his if all he will do to his customers asking for help and support is "I'll call your mom" and "I have your IP", because I think that beats EA and Jagex at customer service.

Leave ur thoughts on this!

Wow, man. I'm sorry to hear this. You're a good customer of mine and it's not nice to see this happen to you. Jombah, that's far from professional, man.

EDIT: Chargeback was a bit rough though lol. Did you approach him for a refund first?

Did you threaten him first? If not, then he's a piece of shit. Tbh, you're probably safer not buying from anyone here. Especially if vendors act like that guy.

kindly. After that it all escalated.

He's probably a child or early teen. Acting like a pubescent little boy with threats.

Did you not have a contract?

Riyu - March 6, 2019, 7:28 am

Yea, with the message he should be more selective on who he allows to wear vendors badges.
Hopefully they remove his for threatening peoples, or at very least ban him for a period of time.

No thats my IP

It's the fact that he used info he got from the autobuy that grinds my gears. OP, if this is a cracking eBook, I've got you. I will mentor you over Discord.
