Thread: [Effective Spreading Methods?](#)

HTP3 - March 6, 2019, 8:08 am

Hello HF

I am looking for effective spreading methods. I have exploits/convincing files/docs/lnk etc. My worm/RAT's/malware is all FUD.

But I do not know where to spread them.

If you can help me out with a method to get bots (even if it means sitting there all day manually spreading) I would be most grateful.

The thing is with me, when I do get bots I can cash them out instantly into high amounts of BTC (depending on the bot of course).

But the bots I'm getting are not high quality at all. If you can help me out, I will make it worth your time.

Maybe I can join in what you are doing?

I currently have over 1000 low quality bots and this is mostly from spreading to freelance web developers. (I'm sure some of you will be aware of these methods)

TLDR: Give me/sell me spreading methods and I will make it worth it for you.

If your problem is you cannot bypass anti-virus, or you need good hosting, or Chrome blocks your downloads, I can give you valuable information for all of this. ?

PS: I will pay you up front if you can prove you have high quality bots.

WhatTheLeak - March 6, 2019, 8:19 am

That won't work. No one will release their (working) method because it's getting faster saturated. The ones that know how to spread, also know how to make money with their bots. You could even make cash with your 1k low quality bots..

The thing is not everyone knows how to cash out. I guess if they have an effective private method they probably doing something with them though.

How to make money from LQ bots? ?

I.M.P - March 6, 2019, 8:31 am

RATTAH just stop already pls. Even if your not you have 2 alts already

How to make money from LQ bots? ?

This isn't a nigerian carding forum with "private cash out methods".. If someone knows how to gain many bots and he's planning to cash out, he will.. So don't expect to get help from a master spreader, because he won't ever share his method with someone who knows a private method to cashout hacked PPs (or whatever)to BTC.. I could do so much with 1000 bots..
